California Bay Area They are highly clustered and this is partly due to population clustering The phenomenon is also explained by a simple game about location competition 2 There are two players in this game a hot dog stand and a beach The beach is a straight shoreline in which customers are uniformly spread out The beach is represented by a number line ranging from 0 at one endpoint to 1 at the other 3 You can approach the game of business by ignoring the competition Assume you are the only hot dog stand on a beach Where would you want to locate The answer is simple any place you want You are a monopolist and customers will have to walk to you no matter where you are 4 The logic behind game theory is that if either hot dog stand chooses the center point the other will want to copy since it is better to split the market than end up on one side that yields less than half the market
