Hybrid Intelligent Systems Ajith Abraham, Thomas Hanne, Oscar Castillo, Niketa Gandhi, Tatiane Nogueira Rios, Tzung-Pei Hong, 2021-04-16 This book

highlights the recent research on hybrid intelligent systems and their various practical applications. It presents 58 selected papers from the 20th International Conference on Hybrid Intelligent Systems HIS 2020 and 20 papers from the 12th World Congress on Nature and Biologically Inspired Computing NaBIC 2020 which was held online from December 14 to 16 2020. A premier conference in the field of artificial intelligence, HIS NaBIC 2020 brought together researchers, engineers, and practitioners whose work involves intelligent systems, network security, and their applications in industry. Including contributions by authors from 25 countries, the book offers a valuable reference guide for all researchers, students, and practitioners in the fields of science and engineering.

Outcome-Driven Business Architecture Amit Tiwary, Bhuvan Unhelkar, 2018-08-06. This book discusses business architecture as a basis for aligning efforts with outcomes. It views BA as complementary to enterprise architecture where the focus of technological initiatives and inventories is to understand and improve business organization, business direction, and business decision making. This book provides a practical long-term view on BA. Based on the authors' consulting experience and industrial research, the material in this book is a valuable addition to the thought processes around BA and EA. The lead author has direct and practical experience with large clients in applying APQC capability framework for undertaking multiple enterprise-wide capability assessments.

Business Process Management Forum Dirk Fahland, Chiara Ghidini, Jörg Becker, Marlon Dumas, 2020-09-03. This book constitutes the proceedings of the BPM Forum of the 18th International Conference on Business Process Management BPM 2020 which was planned to take place in Seville, Spain, in September 2020. Due to the COVID-19 pandemic, the conference took place virtually. The BPM Forum hosts innovative research which has a high potential of stimulating discussions. The papers selected for the forum are expected to showcase fresh ideas from exciting and emerging topics in BPM, even if they are not yet as mature as the regular papers at the conference. The 19 papers presented in this volume were carefully reviewed and selected from a total of 125 submissions to the main conference. They were organized in topical sections named process modeling, process mining, predictions, and recommendations, BPM adoption and maturity, and standardization, change, and handoffs.

Advances in Knowledge-based and Intelligent Information and Engineering Systems Manuel Graña, 2012. In this 2012 edition of *Advances in Knowledge-based and Intelligent Information and Engineering Systems*, the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world. The 228 papers that are included cover a wide range of topics. One emphasis is on Information Processing, which has become a pervasive phenomenon in our civilization. While the majority of Information Processing is becoming intelligent in a very broad sense, major research in Semantics, Artificial Intelligence, and Knowledge Engineering supports the domain-specific applications that are becoming more and more present in our everyday living. Ontologies play a major role in the development of Knowledge Engineering in various domains, from Semantic Web down to the design of specific Decision Support Systems. Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here. Other subjects
