

OBJECTIVE:

- The main aim of the project is to simulate handoff performance using MATLAB code.

SOFTWARE USED:

- MATLAB R2020a
- MATLAB an abbreviation of ("MATrix LABoratory") is a proprietary multi-paradigm programming language and numeric computing environment developed by mathworks.

INTRODUCTION:

- Handoff refers to a process of transferring an ongoing call or data session from one channel connected to the core network to another.
- Process of transferring a MS from one base station to another.
- Also called as Handover
- Handoff management is the process by which a mobile node keeps its connection active when it moves from one access point to another.

STAGES IN HANDOFF:

- There are three stages in a handoff process.
- First, the initiation of handoff is triggered by either the mobile device,

MATLAB and Simulink Code Generation F Marquez, 2019-04-07 Generating code from MATLAB algorithms for desktop and embedded systems allows you to perform your software design implementation and testing completely within the MATLAB workspace You can Verify that your algorithms are suitable for code generation Generate efficient readable and compact C C code automatically which eliminates the need to manually translate your MATLAB algorithms and minimizes the risk of introducing errors in the code Modify your design in MATLAB code to take into account the specific requirements of desktop and embedded applications such as data type management memory use and speed Test the generated code and easily verify that your modified algorithms are functionally equivalent to your original MATLAB algorithms Generate MEX functions to Accelerate MATLAB algorithms in certain applications Speed up fixed poin MATLAB code Generate hardware description language HDL from MATLAB code To generate C C or MEX code from MATLAB algorithms you must install the following software MATLAB Coder product C C compiler When writing MATLAB code that you want to convert into efficient standalone C C code you must consider the following Data types C and C use static typing To determine the types of your variables before use MATLAB Coder requires a complete assignment to each variable Array sizing Variable size arrays and matrices are supported for code generation You can define inputs outputs and local variables in MATLAB functions to represent data that varies in size at run time Memory You can choose whether the generated code uses static or dynamic memory allocation With dynamic memory allocation you potentially use less memory at the expense of time to manage the memory With static memory you get better speed but with higher memory usage Most MATLAB code takes advantage of the dynamic sizing features in MATLAB therefore dynamic memory allocation typically enables you to generate code from existing MATLAB code without modifying it much Dynamic memory allocation also allows some programs to compile even when upper bounds cannot be found Static allocation reduces the memory footprint of the generated code and therefore issuitable for applications where there is a limited amount of available memory such as embedded applications

The Elements of MATLAB Style Richard K. Johnson, 2010-12-31 The Elements of MATLAB Style is a guide for both new and experienced MATLAB programmers It provides a comprehensive collection of standards and guidelines for creating solid MATLAB code that will be easy to understand enhance and maintain It is written for both individuals and those working in teams in which consistency is critical This is the only book devoted to MATLAB style and best programming practices focusing on how MATLAB code can be written in order to maximize its effectiveness Just as Strunk and White s The Elements of Style provides rules for writing in the English language this book provides conventions for formatting naming documentation programming and testing It includes many concise examples of correct and incorrect usage as well as coverage of the latest language features The author also provides recommendations on use of the integrated development environment features that help produce better more consistent software
