The Three Secular Plays of Sor Juana Inés de la Cruz Guillermo Schmidhuber, 2014-10-17

Sor Juana Inés de la Cruz 1681-1695 wrote poetry prose and plays and is considered the greatest of Mexican women writers She was an intellectual prodigy reportedly mastering Latin in twenty lessons and at sixteen she entered a convent so that she might continue her learning One of the most influential early feminists in the New World she answered a bishop's criticism in

a letter that has become a classic defense of the education of women She collected a private library of 4 000 volumes but when she was told that her studies were delaying the progress of her spiritual education she gave away her books and devoted herself to religious studies Traditionally scholars have attributed only one complete play to Sor Juana but in 1989 Guillermo Schmidhuber discovered a lost play The Second Celestina which he proved conclusively to be Sor Juana s earliest comedia co authored with Agustin Salazar y Torres Schmidhuber s critical study is the first dedicated exclusively to the secular plays and the first to confirm Sor Juana s authorship of three dramatic pieces Combining literary history and criticism Schmidhuber explores the life and originality of Sor Juana s dramas and helps elucidate her enigmatic genius Though Sor Juana s work as a poet and intellectual has received increasing attention in the last decade writing about her has rarely taken into account her role as dramatist Schmidhuber helps correct this critical imbalance by examining Sor Juana s plays in light of dramatic theory He finds elements of both mannerist and baroque theater in her work sometimes both within the same play

Grammatical Development of Chinese among Non-native Speakers

Xiaojing (Queeny) Wang, 2013-09-17 This book marks an exciting contribution to the development and application of Processability Theory. It offers the reader an extensive overview and a critical discussion of the existing research into processability/procedural skills from Germanic to Asian and Arabic languages. It also develops a new perspective on the study of Chinese as a second language/CSL acquisition moving from theory to practice. The strength of this book lies not only in its innovative approach to CSL learning but also in the potential practical applications of the approach to the development of the Chinese teaching syllabus and elicitation tasks. This research presented will benefit both learners and teachers. As a second language learner acquiring Chinese, this book will tell you how to facilitate the learning process in an easy and scientific way. As a teacher of Chinese, this book will help you to know what to teach and how to teach it and importantly will teach you how to understand learners' language processing from a practical point of view. The book affords a unique insight into the Chinese processability hierarchy which delineates the universal processing trajectory of CSL learners. The research design and data analysis procedures which are presented and explained clearly and thoroughly constitute an original contribution to the growing research into Chinese language acquisition and will pave the way for future research in the field. The book will be of considerable interest to linguists working in the field of Processability Theory and will be enjoyed by both CSL learners and their teachers.

Processability Approaches to Second Language Development and Second Language Learning

Jörg-U. Keßler, 2009-03-26 A fundamental issue in second language acquisition research and in applied linguistics is the question of how learners acquire a second language. Today it is general knowledge that any second language learning follows certain theoretically established and empirically supported developmental sequences. Based on Processability Theory (Pienemann, 1998 and 2005) one can diagnose current states of individual learners' second language development. Knowing about the path of second language development provides important insights into what learners are ready to acquire in the second language at a given point in time. This can support second language learning both in natural and instructional settings. Pienemann's Processability Theory (PT) provides a well researched and empirically substantiated framework to explain the developmental sequences in second language learning across languages. Taking Pienemann (1998 and 2005) as the point of departure, the chapters of this book apply, test and extend PT. The book is organised in four parts: I Introduction, II Current Theoretical Issues within the PT Framework, III Applying PT to the Second Language Classroom and IV Work in Progress within the PT Framework.
