Structural Health Monitoring of Large Structures Using Acoustic Emission-Case Histories Kanji Ono,Tomoki Shiotani,Martine Wevers,Marvin A. Hamstad,2020-11-23 Acoustic emission AE techniques have successfully been used for assuring the structural integrity of large rocket motorcases since 1963 and their uses have expanded to ever larger structures especially as structural health monitoring SHM of large structures has become the most urgent task for engineering communities around the world The needs for advanced AE monitoring methods are felt keenly by those dealing with aging infrastructures Many publications have appeared covering various aspects of AE techniques but documentation of actual applications of AE techniques has been mostly limited to reports of successful results without technical details that allow objective evaluation of the results There are some exceptions in the literature In this Special Issue of the Acoustics section of Applied Sciences we seek contributions covering these exceptions cited here Here we seek contributions describing case histories of AE applications to large structures that have achieved the goals of SHM by providing adequate technical information supporting the success stories Types of structures can include aerospace and geological structures bridges buildings factories maritime facilities off shore structures etc Experiences with AE monitoring methods designed and proven for large stru

Position, Navigation, and Timing Technologies in the 21st Century Y. Jade Morton, Frank van Diggelen, James J. Spilker, Jr., Bradford W. Parkinson, Sherman Lo, Grace Gao, 2021-01-13 Covers the latest developments in PNT technologies including integrated satellite navigation sensor systems and civil applications Featuring sixty four chapters that are divided into six parts this two volume work provides comprehensive coverage of the state of the art in satellite based position navigation and timing PNT technologies and civilian applications It also examines alternative navigation technologies based on other signals of opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications Volume 1 of Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications contains three parts and focuses on the satellite navigation systems technologies and engineering and scientific applications It starts with a historical perspective of GPS development and other related PNT development Current global and regional navigation satellite systems GNSS and RNSS their inter operability signal quality monitoring satellite orbit and time synchronization and ground and satellite based augmentation systems are examined Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath rich urban environment in handling spoofing and interference and in ensuring PNT integrity are addressed A section on satellite navigation for engineering and scientific applications finishes off the volume Volume 2 of Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications consists of three parts and addresses PNT using alternative signals and sensors and integrated PNT technologies for consumer and commercial applications It looks at PNT

using various radio signals of opportunity atomic clock optical laser magnetic field celestial MEMS and inertial sensors as well as the concept of navigation from Low Earth Orbiting LEO satellites GNSS INS integration neuroscience of navigation and animal navigation are also covered The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping precision agriculture wearable systems automated driving train control commercial unmanned aircraft systems aviation and navigation in the unique Arctic environment In addition this text Serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects Includes chapters that focus on the latest developments in GNSS and other navigation sensors techniques and applications Illustrates interconnecting relationships between various types of technologies in order to assure more protected tough and accurate PNT Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications will appeal to all industry professionals researchers and academics involved with the science engineering and applications of position navigation and timing technologies pnt21book.com

Health Monitoring Systems Rajarshi Gupta,Dwaipayan Biswas,2019-11-21 Remote health monitoring using wearable sensors is an important research area involving several key steps physiological parameter sensing and data acquisition data analysis data security data transmission to caregivers and clinical intervention all of which play a significant role to form a closed loop system Subject specific behavioral and clinical traits coupled with individual physiological differences necessitate a personalized healthcare delivery model for around the clock monitoring within the home environment Cardiovascular disease monitoring is an illustrative application domain where research has been instrumental in enabling a personalized closed loop monitoring system which has been showcased in this book Health Monitoring Systems An Enabling Technology for Patient Care provides a holistic overview of state of the art monitoring systems facilitated by Internet of Things IoT technology The book lists out the details on biomedical signal acquisition processing and data security the fundamental building blocks towards an ambulatory health monitoring infrastructure The fundamentals have been complimented with other relevant topics including applications which provide an in depth view on remote health monitoring systems Key Features Presents examples of state of the art health monitoring systems using IoT infrastructure Covers the full spectrum of physiological sensing data acquisition processing and data security Provides relevant example applications demonstrating the benefits of technological advancements aiding disease prognosis This book serves as a beginner s guide for engineering students of electrical and computer science practicing engineers researchers and scientists who are interested in having an overview of pervasive health monitoring systems using body worn sensors operating outside the hospital environment It could also be recommended as a reference for a graduate or master s level course on biomedical instrumentation and signal processing
