Making Requests With Modals American English:

Making Requests by Chinese EFL Learners Vincent X. Wang, 2011 Requests a speech act people frequently use to perform everyday social interactions have attracted particular attention in politeness theories, pragmatics and second language acquisition. This book looks at request behaviours in a significant EFL population: Chinese speaking learners of English. It will draw on recent literature such as politeness theories and cognitive models for interlanguage pragmatics development as well as placing special emphasis on situational context and formulaic language to provide a more fine grained investigation. A range of request scenarios has been specifically designed for this project from common service encounters to highly face threatening situations such as borrowing money and asking a favour of a police officer. Our findings on Chinese style pragmatic behaviours and patterns of pragmatic development will be of value to cross cultural pragmatics researchers, TESOL professionals and university students with an interest in this area of study.

Requests in American and British English Ilka Flöck, 2016-08-25 This volume encompasses a thorough examination of the use of request strategies on two contrastive dimensions. On the cross cultural dimension it compares the use of British and American English request strategies in naturally occurring informal conversations. The conversational data are retrieved from the International Corpus of English (ICE) and the Santa Barbara Corpus of Spoken American English. On the methodological dimension it systematically compares request strategies and their frequency distributions in the conversational data to questionnaire based requests. Highlighting various instrument induced effects, the volume challenges the validity of one of the most widely used and accepted data collection tools in pragmatics research, the DCT. The extensive data analysis contained in the volume includes a wide range of linguistic variables including mitigating and aggravating modification strategies and their interaction with head act directness levels. While it focuses on the first pair part, the book also offers an analysis of request responses from a cross cultural perspective. The findings of the study contribute new insights to research on requests, politeness, variational pragmatics and general research methodology.

The Pragmatics of Requests and Apologies Elizabeth Flores Salgado, 2011-09-07 The purpose of this research is to analyse the pragmatic development of language groups at different proficiency levels and to investigate the relationship between interlanguage pragmatics and grammatical competence. For this study 36 native Spanish speaking EFL learners at different proficiency levels were asked to respond in English to 24 different situations that called for the speech acts of request and apology. Results showed three important aspects. The first finding suggested that basic adult learners possess a pragmatic knowledge in their L1 that allows them to focus on the intended meaning and in most cases to assemble an utterance that conveys a pragmatic intention and satisfies the communicative demands of a social situation. The second finding revealed that there are two essential conditions to communicate a linguistic action: the knowledge of the relevant linguistic rules and the knowledge of how to use them appropriately and effectively in a specific context. The findings further suggested that advanced learners possess the

grammatical knowledge to produce an illocutionary act but they need to learn the specific L2 pragmatic conventions that enable them to know when to use these grammatical forms and under which circumstances **Grammar in Everyday Talk** Sandra A. modification in naturally occurring e mail data through to elicited data from e DCT questionnaires on cyber consultations to the interactive oral discourse of requests in open role plays As a whole the contributions incorporate research with learners from a range of proficiency levels and from diverse linguistic cultural backgrounds while the chapters individually examine developmental aspects of interlanguage request modification requests in electronic contexts comparative learner native speaker requests and instructional effects on mitigation The book will undoubtedly become an important reference for researchers and teachers not only in the field of pragmatics but also in second language acquisition language teaching socio linguistics and discourse analysis

European languages have limited usefulness if our goal is to understand the nature of human language in general. The authors thus question the status of traditionally accepted linguistic units especially their static understanding as a priori entities and suggest instead that an emergent and interactional view of both structure and function offers a better fit with the data from the languages examined.
