

Ibn Ezra on Astrology

Abraham Ibn Ezra's Introductions to Astrology: A Parallel Hebrew-English Critical Edition of the Book of the Beginnings of Wisdom and the Book of the Judgments of the Zodiacal Signs. Edited, translated and annotated by Shlomo Sela. (Brill, Leiden, 2017). Pp. xiii + 822. € 225. ISBN 9789004342279.

Abraham Ibn Ezra (ca. 1089–ca. 1161) was one of the most significant intellectual figures of the medieval Jewish sphere. He was born in Muslim Spain, and throughout the first five decades of his life was immersed in Arabic culture, language, and science. The invasions of intolerant Berber tribes forced him to leave his homeland and lead an itinerant life in Provence, Italy, and England. A biblical exegete, grammarian and poet, he also wrote extensively on scientific subjects, mathematics, astrology, astronomy, scientific instruments and tools, as well as the Jewish calendar. Ibn Ezra composed his scientific corpus in the Hebrew language for a Jewish readership who had little or no knowledge of the Arabic language and sciences. As Shlomo Sela rightly claims, had it not been for the transition from Muslim Spain to Latin Europe, forcing Ibn Ezra to write in Hebrew and making him teach a plethora of scientific subjects in the Holy Tongue, he probably would have long been forgotten. In the process of the secularization of Hebrew in the Middle Ages, rendering it into a lingua franca of science and philosophy for Jewish communities outside the Muslim realm, Abraham Ibn Ezra was one of the most original and prolific coiner of new scientific terms, as shown in various works by Sela and Gad Ben-Ami Sarfatti.

This new volume by Shlomo Sela thematically unites both of Abraham Ibn Ezra's complex introductory astrological treatises, which serve to present the astrological *Wehranschaunung* and explain concepts in the various branches of astrology, such as world astrology, medical astrology, etc., treated elsewhere by Ibn Ezra. These two works demonstrate the tight connection between astrology and astronomy in the Middle Ages. The first treatise is *Reshit Hokhmah* (Beginning of wisdom), the longest and most influential of Ibn Ezra's astrological works, of which no fewer than seventy copies have survived. The second is *Mishpetei ha-Mazzalot* (Judgements of the zodiacal signs), only about one third the length of *Reshit Hokhmah*, which, by contrast, is the most obscure text which was never referred to by Ibn Ezra. The book under review constitutes Sela's fifth volume in Brill's series on the astrological writings of Abraham Ibn Ezra (19 of which are known to exist). It completes the publication of Ibn Ezra's Hebrew astrological work.

Sela's general introduction lays the contextual and theoretical foundations, preparing readers to understand the big picture, such as Ibn Ezra's biography, comparison of the two treatises, summary of the astronomical content, transmission in Hebrew and in Latin, description of the manuscripts used for the critical edition as well as editorial and translation principles. Most significant is Sela's change of working hypothesis. During his work on earlier volumes, Sela assumed that Ibn Ezra's references to Arabic sources were paraphrases he simply remembered. However, when Sela was searching the sources of *Reshit Hokhmah*, it turned out that more than one quarter of the text is made of translations or

Encyclopedia of Religion , 2005 **The Jewish Encyclopedia** , 1925 *Scientific Weather Forecasting in the Middle Ages* Kindī, Gerrit Bos, Charles S. F. Burnett, 2000 First Published in 1999 Man has always tried to find effective ways to predict the weather Simple predictions from meteorological phenomena or from the constellations rising in the sky can be found attributed to Aristotle and in Varro Pliny Ptolemy and the paragonata of Classical times However the particular cultural situation of Baghdad in the mid ninth century encouraged the production of what can be regarded as the first scientific treatises on weather forecasting These are two letters of the Philosopher of the Arabs Ya q b ibn Ish q al Kindi ca 800 ca 870 who combines at least three traditions of weather forecasting the native Arabic agricultural tradition Greek Aristotelian meteorology and scientific astrology This volume sketches the history of weather forecasting from ancient times through to the Early Modern period and places the two letters of al Kindi in their historical and intellectual context The original Arabic text of al Kindi s letters has not been discovered but the work is known through two Hebrew translations and an independent Latin version made directly from the Arabic in which the two letters have been combined into one treatise All these texts are edited here together with an annotated English translation of the principal Hebrew version and a detailed commentary This book not only adds to our knowledge concerning al Kindi but is also the first study devoted exclusively to medieval weather forecasting a topic which from the evidence of the number of texts and manuscripts had a significant place in medieval scientific and social culture
