Astrology and Cosmology in Early China David W. Pankenier, 2013-10-10 Drawing on a vast array of scholarship this pioneering text illustrates how profoundly astronomical phenomena shaped ancient Chinese civilization *Astrology and Cosmology in Early China* David William Pankenier, 2013 *The Origin and Development of Dougong and Zaojing in Early China* Jing Xie, 2023-04-04 This book focuses on two significant architectural elements in traditional Chinese buildings that is Dougong and Zaojing Dougong is a bracket set often sitting above columns and beams as a key component in the great buildings and tombs of imperial China Zaojing is a special structure sunken into the ceiling often profusely decorated with carvings and colorful paintings in various motifs The book inquires about the origin of Dougong and Zaojing in the Chinese Bronze Age and their heavenly interpretations in the Han dynasty 206 BCE 220 Compared to their later technically oriented development during the Tang to the Qing dynasties c 618 1912 and their preservation and innovative reinterpretation in modern times the rich cultural meanings originally embodied in Dougong and Zaojing have almost disappeared **Sacred Landscapes of Imperial China** Giulio Magli, 2020-06-15 This book analyses the magnificent imperial necropolises of ancient China from the perspective of Archaeoastronomy a science which takes into account the landscape in which ancient monuments are placed focusing especially but not exclusively on the celestial aspects The power of the Chinese emperors was based on the so called Mandate of Heaven the rulers were believed to act as intermediaries between the sky gods and the Earth and consequently the architecture of their tombs starting from the world famous mausoleum of the first emperor was closely linked to the celestial cycles and to the cosmos This relationship however also had to take into account various other factors and doctrines first the Zhao Mu doctrine in the Han period and later the various forms of Feng Shui As a result over the centuries diverse sacred landscapes were constructed Among the sites analysed in the book are the pyramids of Xi'an from the Han dynasty the mountain tombs of the Tang dynasty and the Ming and Qing imperial tombs The book explains how considerations such as astronomical orientation and topographical orientation according to the principles of Feng Shui played a fundamental role at these sites **New Directions in the Study of Ancient Geography** Duane W. Roller, 2020-07-28 This volume brings together five essays that represent the latest directions in the study of geography in classical antiquity Arranged chronologically these contributions cover several centuries and cultures ranging from ancient Mesopotamia to the Roman Empire and deal with topics such as ancient cosmology literary interpretations of geography ancient navigation and geography in the Roman Imperial world Beginning in the ancient Near East Paul T Keyser's essay considers how Greek scholars whose views on the cosmos are still relevant today were influenced by early Near Eastern beliefs about the universe Moving to the Hellenistic period Duane W Roller presents and provides commentary on a navigational guide for Ptolemaic seamen written by Ptolemy II's chief of naval staff Timosthenes of Rhodes Georgia L Irby provides an analysis of a literary map the Shield of Aeneas from Vergil's Aeneid as well as a detailed study of Pomponius

Mela and his *Chorographia* the earliest surviving Greco Roman geographical treatise and the only extant independent geographical work in Latin An essay by Molly Ayn Jones Lewis completes the volume by describing how Tacitus's *Germania* of the early second century AD is a work heavily reliant on environmental determinism an issue that is still relevant today Together these essays demonstrate the great diversity of both ancient geographical writing and modern scholarship on ancient geography This volume will be greeted with enthusiasm by ancient historians and classical studies scholars particularly those interested in the cultural and political facets of geography

Imperiled Destinies Franciscus Verellen, 2020-10-26 *Imperiled Destinies* examines the evolution of Daoist beliefs about human liability and redemption over eight centuries and outlines ritual procedures for rescuing an ill starred destiny From the second through the tenth century CE Daoism emerged as a liturgical organization that engaged vigorously with Buddhism and transformed Chinese thinking about suffering the nature of evil and the aims of liberation In the fifth century elements of classical Daoism combined with Indian yogic practices to interiorize the quest for deliverance The medieval record portrays a world engulfed by evil where human existence was mortgaged from

birth and burdened by increasing debts and obligations in this world and the next Against this gloomy outlook Daoism offered ritual and sacramental instruments capable of acting on the unseen world providing therapeutic relief and ecstatic release from apprehensions of death disease war spoilt harvests and loss Drawing on prayer texts liturgical sermons and experiential narratives Franciscus Verellen focuses on the Daoist vocabulary of bondage and redemption the changing meanings of sacrifice and metaphoric conceptualizations bridging the visible and invisible realms The language of medieval supplicants envisaged the redemption of an imperiled destiny as debt forgiveness and deliverance as healing purification release or emergence from darkness into light

The Evolution of Chinese Filiality Deborah Lynn Porter, 2022-03-10 This unique book brings a fresh interdisciplinary approach to the analysis of ancient Chinese history creating a historical model for the emergence of cultural mainstays by applying recent dramatic findings in the fields of neuroscience and cultural evolution The centrality in Chinese culture of a deep reverence for the lives of preceding generations filial piety is conventionally attributed to Confucius 551-479 B.C. who viewed hierarchical family relations as foundational for social order Here Porter argues that Confucian conceptions of filiality themselves evolved from a systemized set of behaviors and thoughts a mental structure which descended from a specific Neolithic mindset and that this psychological structure was contoured by particular emotional conditions experienced by China s earliest farmers Using case study analysis from Neolithic sky observers to the dynastic cultures of the Shang and Western Zhou the book shows how filial piety evolved as a structure of feeling a legacy of a cultural predisposition toward particular moods and emotions that were inherited from the ancestral past Porter also brings new urgency to the topic of ecological grief linking the distress central to the evolution of the filial structure to its catalyst in an environmental crisis With a blended multidisciplinary approach

combining social neuroscience cultural evolution cognitive archaeology and historical analysis this book is ideal for students and researchers in neuropsychology religion and Chinese culture and history Visualising Skyscapes Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere that great dome of the sky which governs light and darkness critical to life itself yet its influence is often neglected in the archaeological narrative Visualising Skyscapes captures a growing interest in the emerging field of skyscape archaeology This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam its contents have a wide reaching relevance for the fields of archaeology anthropology ethnography archaeoastronomy astronomy heritage and cultural studies The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world Visualising Skyscapes captures the growing interest in the multidisciplinary study of skyscapes and will be of interest to academics students and the general public as well as having international appeal It is topical timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images *The Songs of Chu* Yuan Qu, 2017-07-18 Sources show Qu Yuan 340 278 BCE was the first person in China to become famous for his poetry so famous in fact that the Chinese celebrate his life with a national holiday called Poet s Day or the Dragon Boat Festival His work which forms the core of the *The Songs of Chu* the second oldest anthology of Chinese poetry derives its imagery from shamanistic ritual Its shaman hymns are among the most beautiful and mysterious liturgical works in the world The religious milieu responsible for their imagery supplies the backdrop for his most famous work *Li sao* which translates shamanic longing for a spirit lover into the yearning for an ideal king that is central to the ancient philosophies of China Qu Yuan was as important to the development of Chinese literature as Homer was to the development of Western literature This translation attempts to replicate what the work might have meant to those for whom it was originally intended rather than settle for what it was made to mean by those who inherited it It accounts for the new view of the state of Chu that recent discoveries have inspired **Mathematics and Astronomy in the Ancient World** Daniel Patrick Morgan, Tang Quan, 2025-09-26 This book contains an edited selection of the papers presented at the Second International Conference on the History of Ancient Mathematics and Astronomy ICHAMA organized by Tang Quan and Qu Anjing and held in Xi an 2 8 December 2018 commemorating the foundation This collection consisting of papers that have been refined and edited into scientific articles provides an overview of how the history of science can be international stepping beyond area studies without being Euro centric Containing chapters written by East Asia scholars who do not publish widely in English the volume opens an important window into their projects and the state of scholarship in their respective countries in relation to
