M. Cano,2015-08-28 This beginner's guide to 3D design and printing provides librarians with lessons, tips and instructions for integrating these technologies into the K-12 standards-based curriculum. This fascinating primer illustrates how 3D printing can be used in different curriculum areas to engage and inspire your K-12 students. You'll gain insight into the printing process and learn how to best utilize multi-dimensional equipment in your library. Written in non-technical language, the book introduces the technology, shows how to get started and offers ideas for creating project-based learning models. Author Lesley M. Cano, a school librarian with considerable experience integrating 3D printing into the school curriculum, discusses how to implement this technology in projects across disciplines ranging from math to fine arts and grade levels K through 12. She offers concrete examples that can be easily adjusted to fit subject areas and developmental needs. The title also includes step-by-step instructions for using freely available software tools along with practical tips and strategies to manage

implementation of this innovative new technology. Make It Here Matthew Hamilton, Dara Hanke Schmidt,2014-12-04 This is an ideal resource for joining the maker movement no matter the size of your public library or resource level. Libraries of all sizes and resource levels are finding ways to support community innovation and creativity through maker programming and successful programs don't require dedicating an entire area of the library to makerspace activities or sophisticated technologies such as 3D printers. Make It Here: Inciting Creativity and Innovation in Your Library provides a complete step-by-step guide for starting a makerspace program at your library and follows through with instructions for operation and building on your success. This book takes you step-by-step through starting your maker program from finding the right makerspace, making a plan and working with staff to establishing funding and support, launching your makerspace and evaluating and refining your programs. The authors provide guidance based on their personal experiences in creating and developing maker programs in their libraries as well as feedback and lessons learned from library makers across the country. You'll see how easy it can be to bring their ideas to life in ways that will empower your community and be encouraged to be bold and think outside of the box when imagining the possibilities. 3D Printing Sara Russell Gonzalez, Denise Beaubien

Bennett,2016-05-08 Planning and implementing a 3D printing service in a library may seem like a daunting task. Based upon the authors' experience as early adopters of 3D technology and running a successful 3D printing service at a large academic library, this guide provides the steps to follow when launching a service in any type of library. Detailed guidance and over 50 graphics provide readers with sage guidance and detailed instructions on planning a proposal, printer selection, tips, preparing the location, addressing staff concerns for new service, developing service workflows and procedures, managing inevitable disasters, developing policies, conducting the reference interview for 3D printing, staff training, tips, outreach activities.
