- Carbon Monoxide (CO) sensor detects smoldering fires.
- Infrared (IR) sensor measures ambient light and flame signatures, such as flame flicker.
- Thermal detection monitors for dangerous rise in temperature.
- CO Detector End-of-Life reporting (detector needs replacing).
- Smoke detector maintenance reporting (detector needs cleaning or replacing).
- Low Battery Detection.
- One Go / All Go: all smoke/CO detectors in the system programmed as one-go-all-go will sound on alarm.
- Voice announcements (English only).

See Installation Instructions (800-22142 - <https://mywettech.honeywell.com/>) and the Limitations of Fire Alarm Systems Insert (800-15144 12/15) and System Smoke Detectors Application Guide (SPAG9101 7/12).

LED INDICATORS

- The SIXCOMBO Smoke/CO detector has a multi-color top LED:
- Green = Supervisory indication; blinks during power on, reset, and during normal operation.
 - Amber = Signal maintenance and trouble events.
 - Red = Alarm condition (either Smoke or CO).
 - Side LED windows indicate alarms:
 - Red = smoke alarm.
 - Blue = CO alarm.

ENROLLMENT

IMPORTANT NOTES:

- The Smoke, Heat, and Carbon Monoxide (CO) sensors each have unique MAC ID numbers (serial numbers) that are enrolled in separate zones.
- Once enrolled, the device cannot be used with another system until it is removed from the current controller. See the 24-hour Enrollment Deletion section below or the controller's instructions.

Enroll the Device Services (Smoke, Heat, CO)

- Remove the detector from the base plate (tamper switch).
 - Put the control panel in Zone Programming mode.
 - For Lync Controller, Security > Installer code > Program > (scroll down) > SIX Programming.
 - Put the battery tab to activate enrollment process (be sure batteries are seated properly to avoid a false low battery condition). If the battery tab has already been removed and the unit is powered up, press either Test switch for less than 3 seconds to activate the enrollment process.
 - The device attempts enrollment (green LED flashes about 5 seconds). If successful, the green LED lights steady for 3 seconds and the device announces successful enrollment. If the LED does not light steady, enrollment failed. Retry by pressing either Test switch for less than 3 seconds.
- All services (Smoke, Heat, and CO) are automatically enrolled in sequential (or next available) zone numbers with the following default attributes:

Zone	Device Type	Zone Response Type
Smoke Det.	Smoke Detector	Fire No Verification
Heat Det.	Heat Sensor	Fire No Verification
CO Det.	Carbon Mono. Det.	Carbon Monoxide

NOTE: Maintenance and CO End-of-Life are automatically enrolled for the respective smoke and CO zones. Upon either of these conditions, Contact ID code E386 "Low Maintenance Smoke" is sent for the respective zone. Supervision: Detector supervision is factory set for 1 minute and is not programmable.

- To assign zone descriptors for each of the zones and/or change device type or zone response type, select the zone then select **Edit** and make the desired changes. Press **Save** when done.

24-Hour Enrollment Deletion

Use this procedure within 24 hours of initial enrollment to delete this device from the controller. This allows re-enrollment in a specific controller in case enrollment in that controller failed (i.e., the device inadvertently enrolled in a different controller). This resets the device to factory default settings and removes the communication link data in the controller in which it is enrolled, allowing the device to be re-enrolled in the desired controller.

- Press and hold both the Smoke and CO test switches simultaneously for 5 seconds, then release. The green light flashes rapidly.
- Press and hold both buttons again for one second and release.

MOUNTING

If the device is not in its final mounting location when enrolled, conduct Go/No Go tests (see controller's instructions) to verify adequate signal strength. Adjust the device location and orientation as necessary.
