How To Study Public Life Jan Gehl:

How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In How to Study Public Life Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly Societies seem unable to control any change that affects their cities whether positively or negatively Challenges are global but solutions need to be implemented locally How can architectural research contribute to the future of our changing society How has it contributed in the past The theme of the 10th EAAE ARCC International Conference Architectural Research Addressing Societal Challenges was set to address these questions This book Architectural Research Addressing Societal Challenges includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference which was held at the facilities of the Faculty of Architecture of the University of Lisbon The papers have been further divided into the following five sub themes a Changing Society In Transit Global Migration Renaturalization of the City Emerging Fields of Architectural Practice and Research on Architectural Education The EAAE ARCC International Conference held under the aegis of the EAAE and of the ARCC is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe **Architecture and Welfare** Thordis Arrhenius, Ellen Braae, Guttorm Ruud, 2025-01-27 Architecture was fundamental to the realization of welfare state policy in the Nordic countries translating democratic ideals

into concrete spatial materializations An inclusive notion of welfare for all was embraced by a generation of architects landscape architects and planners who labored to give physical form to ideas of equality collectivity and democracy producing a vast architectural output in Scandinavia during the postwar years Today however the architectural legacy of this era is contested Welfare for all no longer enjoys the social or political consensus it once did This publication critically engages with this contested architectural legacy and provides a nuanced portrait of postwar welfare architecture coming to terms with a contentious past and facing an uncertain future With newly commissioned photographic work by contemporary Nordic artists Based on an interdisciplinary research project by KTH Stockholm Oslo School of Architecture University of Copenhagen Internationally renown contributors shed light on aspects of the relationship between architecture and welfare

3rd version of the International Online Conference on Alternative and Renewable Energy Quest 2020 **People Cities**
 Annie Matan, Peter Newman, 2016-11-15 Over the last 50 years architect Jan Gehl has changed the way that we think about architecture and city planning moving from the Modernist separation of uses to a human scale approach inviting people to use their cities *People Cities* tells the inside story of how Gehl learned to study urban spaces and implement his people centered approach in car dominated cities It discusses the work theory life and influence of Gehl from the perspective of those who have worked with him in cities across the globe It will inspire anyone who wants to create vibrant human scale cities and understand the ideas and work of the architect who has most influenced urban design *Places*, 2002 **Public Life Within Buildings** Wahida Islam Rashid, 1996 *Reclaiming City Streets for People*, 2004 **International Seminar on Urban Culture Arte-Polis**, 2006 *A Study of Retail Streets* Julia Elena Sanchez Viamonte, 2004 *Urban Transformation* Peter Bosselmann, 2008-11-26 In articulating new ways of viewing urban areas and how they develop over time Peter Bosselmann offers a stimulating guidebook for students and professionals engaged in urban design planning and architecture By looking through Bosselmann's eyes aided by his analysis of numerous color photos and illustrations readers will learn to see cities anew His hope is that with the fresh vision he offers readers will be empowered to offer inventive new solutions to familiar urban problems **Metropolis**, 2002 **Transforming Cities** Nick Corbett, 2004 Cities can be transformed by better quality public space and *Revival in the Square* explains how to do it In a clear and accessible way it provides an insight into how design strategies for public spaces can revive our cities The book is based on real experience and provides an effective bridge between strategy and action on the ground Endorsed by Richard Rogers international architect and chief adviser to the Mayor of London and by Jon Rouse chief executive of the Housing Corporation *Revival in the Square* is highly relevant to anyone interested in the role of public squares in urban regeneration The book demonstrates how uncluttered and joined up public spaces can be built to promote civic values and commercial competitiveness and how squares can bring people together for a more positive shared experience of urban living It gives practical guidance on creating the high quality public space that is required for an urban renaissance Fully illustrated throughout with international examples of best practice *Revival in the Square* is an important contribution that links strategy and design to the delivery of a better built environment *Revival in the Square* demonstrates how the city square has always been at the heart of public urban life In today's world as cities compete in the global market place their image and quality of life are increasingly important Governments around the world are encouraging city authorities to work with the private sector to invest in regeneration and urban design and new city squares are providing a focus for this activity The various governmental professional and commercial organizations involved with the design development and management of public space have traditionally been divided into separate disciplines resulting in a fragmented system characterized by communication gaps between the main stakeholders *Transforming Cities* *Revival in the Square* explains how to close the gaps through strategic

leadership management and high quality design all helping the delivery of an urban renaissance The book has two main themes Firstly it is about how the decision making infrastructure can be improved secondly it is about the physical design and management required to create and maintain sustainable public spaces The book shows that if people are to be aware of the complexity and variety of the society they are a part of and if they are to appreciate notions of civic identity and respect for others there must be a place they can occasionally see and experience a diverse cross section of that society and this is one of the key functions of the city square **Urban Design Interventions in Inner San Francisco** Simone Le Grange,2004 **Avery Index to Architectural Periodicals** Avery Library,1994
