Consumer Awareness and Textile Sustainability Subramanian Senthilkannan Muthu, 2023-11-27 This contributed volume discusses how consumer awareness of textile sustainability can lead to a more sustainable textile supply chain. From the initial purchase of a textile to its care and longevity, consumer behaviors are at the core of consumption associated with the textile industry. Making consumers aware of the environmental impacts of the clothing products they buy helps them to choose the best alternative which has the lowest footprints and also enable them to help the entire textile sector to become sustainable. In addition, making them aware of environmental footprints of textile products from cradle to grave makes them aware of how best they can take care of their products during use and disposal phases and how they can help to preserve the planet with their earnest efforts to reduce the environmental impacts in their boundary, i.e. the use and disposal phases.
