Ib Business Management November 2012 Paper 2:

Location of International Business Activities Academy of International Business .,2014-12-02 In recent years an extensive range of new research has been revisiting the topic of the location of international business activities from a variety of different perspectives and background interests This work has been inspired in part by two apparently quite different but actually related contemporary trends on the one hand an emergence or revitalization of clusters of activities co located in or around selected global city regions or fast growing metropolitan areas and on the other hand an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational enterprises and their business partners The former trend has given rise to discussions of how the elite of the cultural cognitive economy of the 21st century in Allen Scott s terminology or the creative class Richard Florida s term are now being drawn or brought back to major urban centers while the latter trend is associated with debates over outsourcing and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed An increased interest in the subject of international business location has been shown by scholars in Strategic Management in Economic Geography and in Regional Science as well as in our own interdisciplinary field of International Business Studies However as is often the case in academic research communities these bodies of scholarship have tended to develop at something of a distance from one another each conversing internally more than they have with one another Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013

over or a niche practice It is instead a complex system that offers multiple potentials for interaction with the urban system Urban open space and agriculture can be linked to a productive green infrastructure this forms new urban rural linkages in the urbanizing region and helps shape the city But in order to do this agriculture has to be seen as an integral part of the urban fabric and it has to be put on the local agenda Urban Agriculture for Growing City Regions takes the example of Casablanca one of the fastest growing cities in North Africa to investigate this approach The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects design solutions and multifunctional modules These synergies assure greater resource efficiency particularly regarding the use and reuse of water and they strengthen regional food security and the social integration of multiple spheres A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production The book will have a long lasting legacy and is essential reading for researchers planners practitioners and policy makers who are working on urban development and urban agricultural strategies

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in

almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates

Conservation and Development in Cambodia Sarah Milne, Sango Mahanty, 2015-02-11 Written by leading authorities from Australasia Europe and North America this book examines the dynamic conflicts and synergies between nature conservation and human development in contemporary Cambodia After suffering conflict and stagnation in the late twentieth century Cambodia has experienced an economic transformation in the last decade with growth averaging almost ten per cent per year partly through investment from China However this rush for development has been coupled with tremendous social and environmental change which although positive in some aspects has led to rising inequality and profound shifts in the condition ownership and management of natural resources High deforestation rates declining fish stocks biodiversity loss and alienation of indigenous and rural people from their land and traditional livelihoods are now matters of increasing local and international concern The book explores the social and political dimensions of these environmental changes in Cambodia and of efforts to intervene in and improve current trajectories for conservation and development It provides a compelling analysis of the connections between nature state and society pointing to the key role of grassroots and non state actors in shaping Cambodia s frontiers of change These insights will be of great interest to scholars of Southeast Asia and environment development issues in general

Institutional Challenges to Intermodal Transport and Logistics Jason Monios, 2016-05-23 While the operational realities of intermodal transport are relatively well known the institutional challenges are less well understood This book provides an overview of intermodal transport and logistics including the policy background emerging industry trends and academic approaches Establishing the three key features of intermodal transport geography as intermodal terminals inland logistics and hinterland corridors Jason Monios takes an institutional approach to understanding the difficulties of successful intermodal transport and logistics Key areas of investigation include the policy and planning background the roles of public and private stakeholders and the identification of emerging strategy conflicts Substantial empirical content situates the theoretical and practical issues in real world examples via three detailed case

study chapters covering the USA UK and Europe making the book useful to students as well as practitioners desiring an understanding of how intermodal transport and logistics work in practice The identified challenges to intermodal transport and logistics are used to demonstrate how competing port and inland strategies can inhibit the necessary processes of integration required to underpin successful intermodal transport The book concludes with a look at the future of institutional adaptation that may enhance the capacity of freight actors to engage with intermodal transport developments
