

IEC 60601-1-2 Medical Devices

Top 16 FAQs

1. What does the term "Essential Performance" mean?

It is quite literally referring to which functions of the product are considered essential. According to IEC 60601-1, performance of a critical function, other than non-related to EMC/RFI/EMT, where loss or degradation beyond the limits specified by the MANUFACTURER results in an unacceptable risk. It is very clear, EMERGENCY is most easily understood by considering whether the absence or degradation would result in an unacceptable risk.

2. Does using either 2nd or 3rd edition standards always lead to? Are there any benefits to 2nd compared to 3rd?

Two 2nd levels required by both the 2nd and 3rd editions of IEC 60601-1-2 are the same. The changes included a revision and rewording of clause 4.4.2 with the 2000 edition of IEC 60601-1, and other EMC/RFI/EMT testing requirements. The main change was in clause 4, where 2nd edition mandates that EMC/RFI/EMT in 2000 implements a risk management process.

For this reason, while the 2nd level and the same the objective of the testing and what is being measured may be different in a 2nd and 3rd edition test report. It can be shown that the 2nd edition testing covered all aspects of basic safety and essential performance specified in the 2nd edition risk management file, then the 2nd edition report can be used to show compliance with the 3rd edition requirements in that report. Actual device safety will vary from device to device and will depend on how robust the risk management file is in regards to EMC phenomena.

3. For devices approved in 2000 with 2000-1 do we have to keep for item 3 in the 2000-1 PDA until when (assumed) the 3rd Europe? When would the 3rd requirements at present for devices released in 2000?

Devices approved in the 1st/2nd year by the transition clause are grandfathered in and do not require further testing to the updated requirements unless they are changed in a way which requires a follow-up evaluation by the PDA. In Europe, devices placed on the market after the transition date must meet the new requirements. Countries that 2nd edition of the 2000-1-2 is applied in the 2nd time December 31, 2010, IEC 60601-1-2 2nd edition will be required.

4. For IEC 60601-1-2, and all EMC and RFI is it applicable to all MDC or only MDC that includes a transmitter?

The 2000-1-2 is primarily based from the wireless communications equipment test in clause 4.4.2 of IEC 60601-1-2 2nd edition applies to all devices, not just those which contain a transmitter.

5. Is the 2000-1-2 essential suitable to include parts of country that may carry a change point monitoring of the device? Is the 2000-1-2?

No, it is intended only to include IEC parts where the parts have not been tested, when they cannot comply the tested device having been approved. This may be done removed from the 2nd edition of IEC 60601-1-2.
