

Introduction

Hybrid Coating Technologies is a company based out of California that has created a new product called Green Polyurethane (PU). It is more environmentally friendly because it is a plant based product that uses renewable resources. This new Green Polyurethane completely eliminates isocyanates which have proven to be harmful to humans and other wildlife. Isocyanates are used in current polyurethane and are confirmed to be hazardous when burned. Green Polyurethane can be used indoors and outdoors on all different types of surfaces.

Hybrid Polyurethane Coating Systems Based On Renewable:

Renewable Resources for Surface Coatings, Inks and Adhesives Rainer Höfer, 2022-11-11 Providing a detailed survey of renewable raw materials for paints inks and glues this book is ideal for researchers and practitioners working in the areas of green chemistry industrial chemistry and sustainability Beginning with a brief history of coatings and adhesives this book walks the reader through the chemistry properties sourcing and processing of a number of renewable raw materials including lipids natural resins proteins and carbohydrates Their use in a range of recent developments and concepts from material protection to decorative paints and coatings adhesives and sealants is highlighted providing the reader with a complete and modern foundation to the field

Eco-Friendly Waterborne Polyurethanes Ram K. Gupta, Ajay Kumar Mishra, 2022-01-24 The polyurethane industry is among the fastest growing with polyurethanes used in consumer as well as industrial sectors Waterborne polyurethanes WPU exhibit many advantages over conventional volatile organic compounds VOCs based polyurethanes and have emerged as an environmentally friendly alternative WPU offer an opportunity to use sustainable raw materials to produce environmentally sustainable polymers particularly polyols derived from vegetable oils Eco Friendly Waterborne Polyurethanes Synthesis Properties and Applications provides state of the art knowledge of the synthesis application and property enhancement of WPU Covers various types of eco friendly materials and technologies used to synthesize WPU Presents an overview and applications of WPU in several advanced research areas Provides fundamentals of synthetic processes and their chemistries for specific applications Elaborates on advanced approaches used to convert renewable resources into polymers Offers new direction to scientists researchers and students to better understand the chemistry technologies and applications Written for polymer chemists materials scientists and other researchers and industry this book serves as a comprehensive reference for readers interested in the development and application of sustainable polymers

Green Nanotechnology Oleg Figovsky, Dmitry Beilin, 2017-09-01 Green nanotechnology has two goals producing nanomaterials and products without harming the environment or human health and producing nanoproducts that provide solutions to environmental problems It uses existing principles of green chemistry and green engineering to make nanomaterials and nanoproducts without toxic ingredients at low temperatures using less energy and renewable inputs wherever possible and using lifecycle thinking in all design and engineering stages The production and process aspects of green nanotechnology involve both making nanomaterials in a more environmentally benign fashion and using nanomaterials to make current chemical processes more environmentally acceptable This book contains information about advanced nanomaterials that can be produced without harming the environment or human health This encompasses the production of nanomaterials without environmental toxicity at room temperature and with the use of renewable energy sources The book contains the descriptions and results of theoretical and experimental researches in the field of environment friendly nanotechnology carried out over the past decade by the scientific team of company Polymate Ltd International
