Geometry of Curves and Surfaces Victor Andreevich Toponogov,2006-09-10 This concise guide to the differential geometry of curves and surfaces can be recommended to rst year graduate students strong senior students and students specializing in geometry The material is given in two parallel streams The rst stream contains the standard theoretical material on

differential geometry of curves and surfaces. It contains a small number of exercises and simple problems of a local nature. It includes the whole of Chapter 1 except for the problems Sections 1.5, 1.7, 1.10 and Section 1.11 about the phase length of a curve and the whole of Chapter 2 except for Section 2.6 about classes of surfaces. Theorems 2.8, 1.2, 8.4, the problems Sections 2.7, 4.2, 8.3 and the appendix Section 2.9. The second stream contains more difficult and additional material and formulations of some complicated but important theorems for example a proof of A. D. Aleksandrov's comparison theorem about the angles of a triangle on a convex surface, formulations of A. V. Pogorelov's theorem about rigidity of convex surfaces and S. N. Bernstein's theorem about saddle surfaces. In the last case the formulations are discussed in detail. A distinctive feature of the book is a large collection (80 to 90) of nonstandard and original problems that introduce the student into the real world of geometry.
