Doosan Engine:

Modern Marine Internal Combustion Engines Ievgen Bilousov, Mykola Bulgakov, Volodymyr Savchuk, 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four stroke marine engines, gas and gas diesel engines, and low speed two stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development, and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine depicting its main design features. This book offers a unique self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture, marine engineering, with their design projects at both master and graduate levels, thus filling an important gap in the literature. *October 2022 - Surplus Record Machinery & Equipment Directory* Surplus Record, 2022-10-01 SURPLUS RECORD is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 100 000 industrial assets, including metalworking and fabricating, machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more.
