Satellite Channels :

Federal Register ,1993-07-16 **Online TV** Catherine Johnson,2019-01-04 With growth in access to high speed broadband and 4G and increased ownership of smartphones tablets and internet connected television sets the internet has simultaneously begun to compete with and transform television Online TV argues that these changes create the conditions for an emergent internet era that challenges the language and concepts that we have to talk about television as a medium In a wide ranging analysis Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry From providing definitions of online TV and the online TV industry to examining the ways in which technology rights interfaces and algorithms are used to control and constrain access to audiovisual content Online TV is a timely intervention into debates about contemporary internet and television cultures A must read for any students scholars and practitioners who want to understand and analyse the ways in which television is intertwining with and being transformed by the internet **Tune the Hidden Signals on Satellite TV** Thomas P. Harrington,Robert B. Cooper,1986 **Media Firms** Robert G. Picard,2014-04-04 Media Firms presents studies applying the company level approach to media and communication firms It explores differences among missions strategies organizational choices and other business decisions Reviewing economic factors and pressures on media and communications companies this book seeks to improve understanding of how these elements affect market and company structures operations and performance of firms The chapters written by leading scholars worldwide were selected from papers on the theme of media firms presented at the 5th World Media Economics Conference hosted by the Turku School of Economics and Business Administration and The Journal of Media Economics The collected studies provide an overview of economic and related managerial issues affecting the structures of markets in which firms compete the operations of media and communications firms and their financial performance As a result it expands the discussion of economic issues traditionally associated with the field due to narrowed focus of initial books in media economics It is hoped that this book will induce additional avenues of inquiry regarding such issues **Nonlinear Channel Models And Their Simulations** Yecai Guo,2022-06-27 This comprehensive compendium highlights the research results of nonlinear channel modeling and simulation Nonlinear channels include nonlinear satellite channels nonlinear Volterra channels molecular MIMO channels etc This volume involves wavelet theory neural network echo state network machine learning support vector machine chaos calculation principal component analysis Markov chain model correlation entropy fuzzy theory and other theories for nonlinear channel modeling and equalization The useful reference text enriches the theoretical system of nonlinear channel modeling and improving the means of establishing nonlinear channel model It is suitable for engineering technicians researchers and graduate students in information and communication engineering and control science and engineering intelligent science and technology FCC Record United

Violence on Television Barrie Gunter,Jackie Harrison,2013-04-15

Television is often accused of showing too much violence However it is rare that anyone stops to ask what this statement means Violence on Television provides an objective analysis of the violence on television how much there is and what form it takes It presents findings from the largest ever study of the depiction of violence on television carried out in Britain funded by the British Broadcasting Corporation and the Independent Television Commission As well as presenting a quantitative analysis of the amount of violence on television this research places great emphasis on investigating the character of violent portrayals and the contexts in which they occur Barrie Gunter and Jackie Harrison present a detailed literature review which examines previous research from around the world They then explain the methodology and look at the problems of measuring and quantifying violence on television They examine the specific attributes of violence including the form it takes its physical setting its motives and consequences and the nature of the characters involved as either aggressors or victims They also examine the amount and nature of violent portrayals in different programme genres such as films and drama entertainment programming news and factual programmes and children s programmes The book will be of interest to students and researchers in psychology communication studies and media studies

Radio Wave Propagation and Channel Modeling for Earth-Space Systems Athanasios G. Kanatas,Athanasios D. Panagopoulos,2017-12-19 The accurate design of earth space systems requires a comprehensive understanding of the various propagation media and phenomena that differ depending on frequencies and types of applications The choice of the relevant channel models is crucial in the design process and constitutes a key step in performance evaluation and testing of earth space systems The subject of this book is built around the two characteristic cases of satellite systems fixed satellites and mobile satellite systems Radio Wave Propagation and Channel Modeling for Earth Space Systems discusses the state of the art in channel modeling and characterization of next generation fixed multiple antennas and mobile satellite systems as well as propagation phenomena and fade mitigation techniques The frequencies of interest range from 100 MHz to 100 GHz from VHF to W band whereas the use of optical free space communications is envisaged Examining recent research advances in space time tropospheric propagation fields and optical satellite communication channel models the book covers land mobile multiple antennas satellite issues and relative propagation campaigns and stratospheric channel models for various applications and frequencies It also presents research and well accepted satellite community results for land mobile satellite and tropospheric attenuation time series single link and field synthesizers The book examines aeronautical communications channel characteristics and modeling relative radio wave propagation campaigns and stratospheric channel model for various applications and frequencies Propagation effects on satellite navigation systems and the corresponding models are also covered

The Digital Satellite TV Handbook Mark E. Long,1999 CD ROM contains a version of the book with hyperlinks

Digital Technology and the Future of Broadcasting John V. Pavlik,2015-07-16 This volume presents timely discussions on how digital technology is reshaping broadcasting and

the media in the United States and around the world It features contributions from distinguished scholars and young researchers representing work that spans domestic and international issues of technological change and the implications for broadcasting and related media in a global context Among the many issues covered are The impact of digital technology on the structure of broadcasting organizations and regulation The nature of broadcast content or media programming and how it is delivered at home and abroad Engagement and interaction of the public with broadcasting and social and mobile media and The reshaping of revenue models for broadcasters and media organizations globally The first two parts of the volume addressing research challenges issues and advances in global broadcasting are competitively reviewed research papers which were presented at the BEA2014 Research Symposium The third part focuses on international perspectives with chapters from broadcasting scholars and paper discussants at the Research Symposium This section provides reflection on the problems and prospects for research education and public policy that arise in this era of rapid and continuing change As a benchmark of the remarkable changes taking place in today s media environment the volume sets an agenda for future research on the implications of digital technology for broadcasting and broadcasting education

News Consumption in Libya Mokhtar Elareshi,2014-09-18 This book aims to understand the relationship between Libyan students consumption of satellite TV news services and their perceptions of news issues This involves examining students news consumption habits and their motives for the choices they make In the face of competition from well resourced broadcasters such as Al Jazeera TV what can Libyan news services do to retain audience interest and loyalty Do they need to do anything different Is there room for local and international news in Libya The book also explores whether Al Jazeera and Al Arabiya have affected students use of local TV news services Have local channels been displaced by newer channels and is the use of different channels driven by the same or different news consumption motives The book reveals that there are distinct variations in news consumption defined in part by news platform TV versus radio versus newspaper and in part by type of news providers local versus international TV Students seek out news sources they believe to be credible and that local TV news provision does not reach the students standards of credibility In content there may be room in the evolving news landscape for local TV services to occupy a niche market that still has value for the Libyan public To retain this market however quality of delivery will also be crucial

Popular Science ,2000-06 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *The Status of Competition in the Multichannel Video Programming Distribution Marketplace* United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and the Internet,2002

The Global Public Sphere Ingrid Volkmer,2014-07-17 Over the last several years the debate about publics seems to have newly emerged This debate critically reflects the Habermasian ideal of a national public sphere in a transnational context However it seems that the issue of a reconstruction of a global public sphere is more complex In this brilliant and provocative book Ingrid Volkmer argues that a reflective approach of globalization is required in order to identify and deconstruct key strata of deliberate public discourse in supra and subnational societal formations This construction helps to understand the new processes of legitimacy at the beginning of the 21st century in which the traditional conception of a public and its role as a legitimizing force are being challenged and transformed The book unfolds this key phenomenon of global deliberate interconnectedness as a discursive and negotiated dimension within reflective globalization i e continuously constituting maintaining and refining the life of the global public and conceptualizes a global public sphere Offering insightful case studies to illustrate this new theory of the global public sphere the book will be essential reading for students and scholars of media and communication studies and social and political theory

Innovations in Telecommunications Part B Jamal Manassah,2012-12-02 Innovations in Telecommunications Part B covers the proceedings of the 1981 International Symposium Series on Innovations in Telecommunications held in Kuwait sponsored by the Kuwait Foundation for the Advancement of Science This symposium aims to explore the advances in research development demonstration design manufacture field testing and application in telecommunication This book is organized into two parts encompassing 13 chapters that focus on satellite communication and its applications Following a brief historical introduction Part I deals first with the fundamental principles of information transmission through satellite emphasizing the role of the basic parameters entering into the satellite up and down link budgets These topics are followed by discussions on the development of satellite systems for international domestic and maritime communications This part also describes the technology of satellite TV broadcasting systems both ground and space

as well as the development of communication satellite earth stations Part II surveys the technologies in computer networks application development and system programs that are converging to form national and international networks This part also highlights the development of electronic mail systems and principal modes and techniques in teleconferencing Telecommunications engineers and researchers will find this book rewarding Educational Television In India N.U. Rani,2006 Contents Rise of Indian Television SITE Satellite Instructional Television Experiment A Learning Experience in Connectivity Through Space in India Growth and Development of Education TV ETV in India Institutions Using Educational Media in India EDUSAT India s First Satellite Dedicated to Education GRAMSAT Village Satellite for Empowerment of Rural People in India Networking Technical Education Technical Education in New Millennium Instructional TV Courses in Canada A Case Study of Convergent Classroom for Adoption in Indian Universities Evaluation of Educational Technology and Media Research Classroom of the New Millennium **Routledge Handbook of New Media in Asia** Larissa Hjorth,Olivia Khoo,2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future today we are seeing a much more complex picture of contesting new media practices and production As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices boundaries between art new media and the everyday are transformed This Handbook addresses the historical social cultural political philosophical artistic and economic dimensions of the region s new media Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia It provides an authoritative up to date intellectually broad conceptually cutting edge guide to the important aspects of new media in the region as the first point of consultation for researchers advanced level undergraduate and postgraduate students in fields of new media and Asian studies
