Science And The Modern World Alfred North Whitehead:

Science and the Modern World Alfred North Whitehead, 1967 Alfred North Whitehead's *Science and the Modern World* originally published in 1925 redefines the concept of modern science Taking readers through the history of modern science Whitehead shows how cultural history has affected science over the ages in relation to such major intellectual themes as romanticism relativity quantum theory religion and movements for social progress *Science and the Modern World* Alfred North Whitehead, 1959 Science and the Modern World Alfred North Whitehead, 1925 **Science and the Modern World** Alfred North Whitehead, 2021-01-25 Originally published in 1925 Alfred North Whitehead's *Science and the Modern World* was a groundbreaking work that redefined the concept of modern science It is a work not only of the first importance but also of great beauty in which the author dramatically describes what had long engaged his meditations namely the rise triumph and impact of scientific materialism according to which nature consists of nothing else but a flux of purely physical energy while at the same time criticizing this materialism as mistaking an abstract system of mathematical physics for the concrete reality of nature Whitehead's mind was at home with such abstractions indeed with Bertrand Russell he co authored the epochal *Principia Mathematica* and he saw them as real discoveries not intellectual inventions but his sense for the fullness of existence led him to urge upon philosophy the task of making good their omissions by reverting to the variety of concrete experience first then framing broader ideas In this Whitehead anticipated insights that would come to dominate the philosophy of science in the latter part of the twentieth century Moving masterfully through the history of modern science he shows how cultural history has affected science over the ages in relation to such major intellectual themes as romanticism relativity quantum theory religion and movements for social progress Throughout this narrative philosophy is put forward as humanity's fundamental intellectual pursuit a medium of change and reconfiguration from which all thought scientific included derives its strength This fascinating volume that will be of value to anyone with an interest in philosophy or the history of science Science and the Modern World Alfred North Whitehead, 2021-01-25 Originally published in 1925 Alfred North Whitehead's *Science and the Modern World* was a groundbreaking work that redefined the concept of modern science It is a work not only of the first importance but also of great beauty in which the author dramatically describes what had long engaged his meditations namely the rise triumph and impact of scientific materialism according to which nature consists of nothing else but a flux of purely physical energy while at the same time criticizing this materialism as mistaking an abstract system of mathematical physics for the concrete reality of nature Whitehead's mind was at home with such abstractions indeed with Bertrand Russell he co authored the epochal *Principia Mathematica* and he saw them as real discoveries not intellectual inventions but his sense for the fullness of existence led him to urge upon philosophy the task of making good their omissions by reverting to the variety of concrete experience first then framing broader ideas In this Whitehead anticipated insights that would come to dominate the philosophy of science in the latter part of the twentieth century Moving

masterfully through the history of modern science he shows how cultural history has affected science over the ages in relation to such major intellectual themes as romanticism relativity quantum theory religion and movements for social progress Throughout this narrative philosophy is put forward as humanity s fundamental intellectual pursuit a medium of change and reconfiguration from which all thought scientific included derives its strength This fascinating volume that will be of value to anyone with an interest in philosophy or the history of science Science and the Modern World, By Alfred North Whitehead. Lowell Lectures, 1925 Alfred North Whitehead,1927 La science et le monde moderne d'Alfred North Whitehead? François Beets,Michel Dupuis,Michel Weber,2013-05-02 The second international Chromatiques whiteheadiennes conference was devoted exclusively to the exegesis and contextualization of Whitehead s Science and the Modern World 1925 In order to elucidate the meaning and significance of this epoch making work the Proceedings are designed to form companion volume With one paper devoted to each of its thirteen chapters the Proceedings aim on the one hand to identify the specific contribution of each chapter to Whitehead s own research program that is to say to put its categories into perspective by means of an internal analysis and on the other hand to identify its global impact in the history of ideas Science and the Modern World: Lowell Lectures Alfred North Whitehead,2018-01-05 This is another book by English mathematician and philosopher Alfred North Whitehead best known as the defining figure of the philosophical school known as process philosophy which today has found application to a wide variety of disciplines including ecology theology education physics biology economics and psychology among other areas Beginning in the late 1910s and early 1920s Whitehead gradually turned his attention from mathematics to philosophy of science and finally to metaphysics He developed a comprehensive metaphysical system which radically departed from most of western philosophy Whitehead argued that reality consists of processes rather than material objects and that processes are best defined by their relations with other processes thus rejecting the theory that reality is fundamentally constructed by bits of matter that exist independently of one another Today Whitehead s philosophical works particularly Process and Reality are regarded as the foundational texts of process philosophy *Alfred North Whitehead's science and the modern world* François Beets,Michel Dupuis,Michel Weber,2006 The second international Chromatiques whiteheadiennes conference was devoted exclusively to the exegesis and contextualization of Whitehead s Science and the Modern World 1925 In order to elucidate the meaning and significance of this epoch making work the Proceedings are designed to form a companion volume With one paper devoted to each of its thirteen chapters the Proceedings aim on the one hand to identify the specific contribution of each chapter to Whitehead s own research program that is to say to put its categories into perspective by means of an internal analysis and on the other hand to identify its global impact in the history of ideas Science and the Modern World Alfred North Whitehead,1925

Harvard Lectures of Alfred North Whitehead Paul Bogaard,2017-03-21 Presents Whiteheads lectures at Harvard during the 1924/5 academic year the first philosophy lectures he ever gave Beginning in September of 1924 Alfred North

Whitehead presented a regular course of 85 lectures which concluded in May of 1925. These represent the first ever philosophy lectures he gave and capture him working out the philosophical implications of the remarkable turns physics had taken in his lifetime. This volume finally recreates these lectures by transcribing notes by W P Bell, W E Hocking and Louise Heath taken at the time, many of which have only recently been discovered and including hundreds of sketches of Whitehead's blackboard diagrams. This is a unique insight into the evolution of Whitehead's thought during the months when he was drafting his seminal work *Science and the Modern World*. Includes transcriptions of the lecture notes, a chronology, over 300 line drawings of Whitehead's blackboard sketches, a bibliography of referenced works and an index to the lectures. Gives an overview of the content of the 85 lectures. Clarifies how these lectures represent Whitehead's philosophical insights. Describes the circumstances that preserved the three sets of notes. Science and the Modern World. Lowell Lectures, 1925. (Thirteenth Printing.). Alfred North Whitehead, 1964. Charles Olson Robert Von Hallberg, 1978. Described as one of the most influential American literary figures of the mid 20th century and a near prophet of the Black Mountain School, Olson was highly regarded as both a theorist and a poet. Here is an examination of Olson's understanding of poetry that provides the framework needed for understanding his work. **The Concept of Nature** Alfred North Whitehead, 1920. The Turner Lectures delivered in Trinity College, November 1919. Main Currents of Western Thought Franklin Le Van Baumer, 1978-01-01. Baumer's collection maps better than any other with which we are familiar the seminal and distinguishing ideological climates in western civilization. Seventeenth Century News. Many disciplines create books of readings by the dozens; it is a rare event when a reader helps to create a discipline. On its initial publication in 1952, *Main Currents of Western Thought* did just that. In the years since its first appearance, *Main Currents* has remained unquestionably the leading reader in its field. The illuminating short essays that introduce sections and subsections are well known, but the continuing usefulness of any reader depends upon the quality of its selections. Franklin Le Van Baumer has sought out passages that best represent and illuminate the ideas and preoccupations of each age. He has found them in the works of the great, including Augustine, Aquinas, Dante, Luther, Newton, Voltaire, Darwin, Whitehead, and Freud. But he has also discovered telling statements in writings less widely known: Ramon Lull on chivalry, 13th century; Henry Peacham on the complete gentleman and Leonard Busher on religious liberty, both 17th century; Louis Ren de la Chalotais on education, 18th century; Samuel Smiles on self help, 19th century; and Virgil Gheorgiu on mechanization, 20th century. *The Harvard Lectures of Alfred North Whitehead, 1925-1927* Brian G. Henning, Joseph Petek, George R. Lucas, 2021. Newly discovered notes on Whitehead's philosophy lectures, 1925-1927. This second volume in the critical edition reproduces more than 170 lectures delivered by Alfred North Whitehead at Harvard during his second and third years. For the first time, readers will be able to see the development of Whitehead's philosophy during the crucial period between the publication of *Science and the Modern World* and his delivery of the Gifford lectures that would become *Process and Reality* as he tests his theories in a classroom.

setting These student notes provide the long missing window into critical developments in Whitehead s thinking during this time They challenge longstanding speculations about when exactly Whitehead developed some of his most famous metaphysical concepts as well as how those concepts are to be properly interpreted against the wider backdrop of his life and thought Also included is a transcript of the only known lecture Whitehead delivered on the topic of ethics two mid year exams given to his students and nearly 2 000 footnotes that provide additional context for the lectures and alternative student accounts of key passages Brian G Henning Founding Executive Editor of the Critical Edition of Whitehead is Professor of Philosophy and Environmental Studies at Gonzaga University in Spokane Washington Joseph Petek Assistant Editor of the Critical Edition is a doctoral candidate in process studies at Claremont School of Theology George Lucas is Distinguished Chair in Ethics and Professor Emeritus of Philosophy at the US Naval Academy *The Divine Matrix* Joseph A.

Bracken,1995 Education from a Whiteheadian Point of View Vesselin Petrov,2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead s 1861 1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead s philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead s in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity s addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development
