Michael Charles Howard, John Edward King, 2014-07-14 The first volume of this critical history covers the social political and theoretical forces behind the development of Marxian economics from Marx's death in 1883 until 1929 the year marking the onset of Stalin's revolution from above which subsequently transformed the Soviet Union into a modern superpower During these years Marxists in both Russia and Germany found their economic ideas inextricably linked with practical political problems and treated theory as a guide to action This book systematically examines the important theoretical literature of the period including insightful works by political functionaries outside academia journalists party organizers underground activists and teachers in the labor movement presented here as the primary forgers of Marxian economic thought Beginning with Engels's writings this book analyzes the work of leading Marxist economists in the Second International then concludes with a review of the intellectual movements within the Marxian political economy during the 1920s A second volume treating the period from 1929 to the present will follow Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Self-assertion of Chinese Academia and Marxist Philosophy* WU Xiaoming, 2021-09-29 From a Marxist philosophical perspective this collection of essays investigates the maturing self consciousness and self assertion of Chinese academia especially within the humanities and social sciences permitting more penetrating insights and critical engagement with the social reality of China The author elaborates on the relationship between Hegel and Marx's philosophy and their concepts of reality thereby accounting for the historic and philosophical conditions for the autonomy of Chinese academia Drawing on intellectual resources from both Eastern and Western archives including phenomenology philosophical hermeneutics Western Marxism and China's pacifist tradition the book refutes Huntington's speculation about Chinese imperialism and delineates how China's development can contribute to a fundamental critique of capitalist civilisation and a new paradigm of global governance In addition the book challenges the thinking of Chinese neo liberals and nationalist conservatives and their understandings of the history and social reality of China Hence the author advocates a reconstruction of the spiritual and intellectual realm within society based on Marxism in order to counter Sinophobia neo liberalism and nationalism at the same time The book will appeal to readers interested in social and political philosophy philosophy of history Marxism and China studies **Reason in Revolt, Vol. I** Ted Grant, Alan Woods, 2002 Reason in Revolt further develops the theory of Dialectical Materialism using the most important scientific discoveries of the 20th century as a tool First exposed by Marx and Engels Dialectical Materialism is a comprehensive methodology explaining the unity of the laws that govern nature science and society from evolution to chaos theory nuclear physics to childhood development First published in 1995 to

coincide with Engel's centenary Reason in Revolt has had a great success around the world It has been published in Spanish Italian Greek Turkish Urdu and is now being translated into German and Flemish The Spanish edition recently went into its second edition To date no one has found serious fault with the science of the book And every new discovery of science serves to confirm the statement of Engels that in the last analysis Nature works dialectically American Philosophy: An Encyclopedia John Lachs, 2008-03-31 The Encyclopedia of American Philosophy provides coverage of the major figures concepts historical periods and traditions in American philosophical thought Containing over 600 entries written by scholars who are experts in the field this Encyclopedia is the first of its kind It is a scholarly reference work that is accessible to the ordinary reader by explaining complex ideas in simple terms and providing ample cross references to facilitate further study The Encyclopedia of American Philosophy contains a thorough analytical index and will serve as a standard comprehensive reference work for universities and colleges Topics covered include Great philosophers Emerson Dewey James Royce Peirce Santayana Subjects Pragmatism Progress the Future Knowledge Democracy Growth Truth Influences on American Philosophy Hegel Aristotle Plato British Enlightenment Reformation Self Assessments Joe Margolis Donald Davidson Susan Haack Peter Hare John McDermott Stanley Cavell Ethics Value Pleasure Happiness Duty Judgment Growth Political Philosophy Declaration of Independence Democracy Freedom Liberalism Community Identity *The Social Structure of the Early Christian Communities* Dimitris Kyrtatas, 2020-05-05 The Social Structure of the Early Christian Communities deals with a small number of topics which in one way or another have long attracted the attention of students of early Christianity Above all it is an attempt to investigate the social origins and the social positions of the early Christians Recent studies are arriving at the conclusion contrary to long held views that the primitive Christian communities those which emerge after the first chapters of Acts did not consist of the dregs of the populace However in spite of the important work which is being done on the subject few of the recent books concerned with such sociological issues go far beyond the New Testament age What still requires investigation is the composition of the early communities from the first years of the mission to the Gentiles down to the age of Constantine when large sections of the population from all social classes started joining the Christian churches *Lenin, Hegel, and Western Marxism* Kevin Anderson, 1995 This first full length treatment of Lenin's studies of Hegel presents Lenin as a major figure in Hegelian Marxism providing a more nuanced portrait of his work than that of either official Marxist Leninism or most Western accounts With impressive argumentation and wide ranging scholarship Anderson presents us with a Lenin that no one seriously interested in current debates over the relevance of Marxist theory to socialist practice can afford to miss Bertell Ollman author of Dialectical Investigations An important contribution to grasping the conceptual roots of Marxist theory and practice Tom Rockmore author of Hegel's Circular Epistemology Today Lenin looks like he did little more than prepare the way for Stalin You will find the opposite view in this novel study I recommend the book to anyone seriously interested in Russia and revolution George Uri Fischer author of The Soviet System and Modern

Society **Rediscovering Lenin** Michael Brie, 2019-07-31 Translated from the original German Lenin Neuentdecken and available in English for the first time this volume rediscovers Lenin as a strategic socialist thinker through close examination of his collected works and correspondence Brie opens with an analysis of Lenin's theoretical development between 1914 and 1917 in preparation for his critical decision to dissolve the Constituent Assembly in January 1918 in a struggle for power This led from the dialectics of revolutionary practice and social analysis to a new understanding of socialism which is compared and contrasted to the alternative Marxist ideas and conceptions of the state posited by Karl Kautsky and Rosa Luxemburg Rediscovering Lenin then moves to 1921 when Lenin begins a new stage of his theoretical development concerned with resolving the reversal of the revolution's aims and its results This process remains unfinished and the questions raised a hundred years ago remain How can one intervene successfully and responsibly in social and political crises What role do social science theories ideological frameworks and other practices play in transforming the economic political and cultural power structures of a society Brie concludes with a retrospective on the ideas developed by Marx and in the Second International and their impact on Lenin's strategic thinking Placing Lenin's writing itself in the foreground and arguing from inside his own self learning Rediscovering Lenin focuses on the reflective relationship between ideology theory and practice

Walter Benjamin and the Critique of Political Economy Duy Lap Nguyen, 2022-07-14 Exploring the connections between Walter Benjamin's philosophy of history and a Marxian Critique of Political Economy Duy Lap Nguyen analyses Benjamin's early writings and their development into a distinct understanding of historical materialism Benjamin's historically materialist conception of history is shown to be characterised by a focus on the religion of capitalism the mythology of the state and messianic time Revealing these factors Nguyen joins up Benjamin's philosophical critique of the Kantian conception of history alongside the historical trajectory of capitalism he subscribed to Influenced by the theory of fascism outlined by German Marxist theorist Karl Korsch we see how Benjamin's own theory of revolution and redemption in capitalist society developed into a sophisticated critique Essential to Benjamin's materialist critique was a recognition of the fallibility of the Enlightenment notion of progress as well as the need to overturn the political and economic catastrophes which enable capitalism and fascism to thrive In mapping the exact course of Benjamin's critical historical materialism Nguyen fully explicates the unique contribution he made to western Marxism
