Una de las preguntas que debemos hacernos en este sentido es por qué no interpretamos todo lo que las emociones generan en nuestra vida cotidiana y en particular lo que tiene que ver con nuestro consumo. La respuesta es también simple lo cierto es que las emociones actúan de manera inconsciente. También sabemos que casi toda la memoria 95% se almacena en el inconsciente de las personas en lo que llamamos memoria implícita. Y esta memoria está todo el tiempo presente en todo lo que hacemos. Pues como anticipamos las emociones influyen en el ámbito del inconsciente aunque desde este dominio también poseen una fuerte participación en el proceso de toma de decisiones. Y quizás lo más importante es que las emociones son las responsables en buena medida de la carga y signo de la energía que mantiene activos a las asociaciones instantáneas de neuronas, percepciones, los caminos neuronales, significaciones, las redes neuronales, codificaciones y los engramas, figuraciones, arquetipos. Este libro está dedicado a comprender el rol e impacto de las emociones en las cuestiones que tienen que ver con nuestro paradigma del marketing esencial y la comunicación mercadológica. Introducción al Estudio sobre el Conocimiento Sensible y la Experiencia Lorenzo Vicente Burgoa, Apreciado lector, esto no es un libro de psicología. Es un libro de filosofía. Aunque trate de un tema muy estudiado por los psicólogos, no es propiamente un tratado de psicología al menos en el sentido corriente de la psicología empírica. Es un libro de filosofía. Esto es un estudio sobre las bases mismas y los fundamentos de la sensación y de la experiencia. La psicología convencional trata de los actos principalmente y de los comportamientos de las personas y los estudia generalmente en otras personas distintas de la del investigador a las cuales se pregunta o se hacen test o se somete a experimentos determinados etc. Pero ahora tratamos de ir más allá de los actos y de los comportamientos aunque sea a través de supuestos o remitiendo a los mismos según la propia experiencia reflexiva tanto personal como de otras personas. Por tanto no es que rechazemos la experiencia al contrario la damos como sabida o conocida suficientemente teniendo en cuenta sus aportaciones para la descripción fenomenológica de los actos o comportamientos humanos de tipo cognoscitivo.
