Effects of Mobile Banking Service Quality on Customer Satisfaction. The Case of Commercial Bank, Ethiopia Tarekegn Balango, 2023-04-25 Seminar paper from the year 2023 in the subject Business economics Business Management Corporate Governance grade 3 85 course Master of business administration language English abstract It was proven that perceived service quality had a positive relationship with customer satisfaction and the researcher thinks this supports the argument of linking mobile banking service and customer satisfaction They use the SERVQUAL model but rather the dimension only scale to assess service quality other than website design and responsiveness The researcher therefore thinks using the SERVQUAL model Miykel Sisaye model would be a contribution to existing research mobile banking context This is the current research gap and in order to fill the gap the researcher was trying to measure service quality and customer satisfaction The study aimed at examining the effect of five online banking service quality dimensions on the customers' satisfaction in the case of CBE The study followed an explanatory research design identifying the dimensions of service quality for online services namely reliability responsiveness personalization web design and security as independent variable and customer satisfaction as dependent variable Primary data was collected for the analysis based on five points Likert scale from 396 sample respondents who are customers of CBE online banking services The data was coded and analyzed using SPSS version 25 software The reliability of the instrument was checked using Cronbach's alpha test The data analysis employed both descriptive and inferential statistical methods The descriptive statistics were used for summarizing the background of respondents and computing average score of CBE on each dimension of service quality and customers' satisfaction Correlation and multiple regression analysis were conducted to examine the relationship between the dependent and independent variables

Vikalpa, 2004 *A Research Report based on an analysis of Service Quality of Sports Centre* Md. Rajibul Hasan, 2013-01-22 Seminar paper from the year 2011 in the subject Business economics Offline Marketing and Online Marketing grade Distinction University of Lincoln course title language English abstract It is an immensely complex exercise to measure the quality of a service There are differences between product and service In case of product there are precise specifications such as length depth width weight color etc On the other hand a service can have several intangible or qualitative features In addition there are some expectations of the consumer regarding the service which can differ significantly based on a range of factors such as experience personal requirements and what other people may have said to them To determine the service quality Parasuraman Zeithaml and Berry 1994 have developed a methodology known as SERVQUAL which is a service quality questionnaire survey methodology

SERVQUAL model suggested five dimensions of service quality They are reliability responsiveness tangibles empathy and assurance Experiences or perceptions and expectation are measured in SERVQUAL model and SERVQUAL model has been well used in retail surroundings Berry 1986 Brown et al 1993 Carmen 1990 Finn and Lamb 1991 Dabholkar et al 1996 including banking fast food dry cleaning Cronin and Taylor 1992 and health care Babakus and Mangold 1989 In diversified businesses as the technologically advanced industrial market Pitt et al 1992 and B2B business to business services Brelsinger and Lambert 1990 include the application of the SERVQUAL However this model raises some doubts as to whether expectations are being assessed at all The gap measured by the SERVQUAL model between expectation and perception is uncertain as to whether this is an indication of initial expectation or how the service is continuously reevaluated whilst it is being executed or experienced Therefore SERVPERF model is proposed by Cronin and Taylor 1992 and this model eliminates expectation from the SERVQUAL and it measures the service quality based on service perception In this paper the SERVPERF model is used to measure the service quality of the sports centre

Effects of Reference Groups and Country of Origin on the Relationship of Service Quality Expectations and Choice of Brands Sankalpa Sen,2018-07-30 Doctoral Thesis Dissertation from the year 2017 in the subject Business economics Offline Marketing and Online Marketing grade 4 0 Jain University language English abstract Service sector is highly impacted with the fourth industrial revolution Technology is back bone of most services today Technology is blurring the characteristics of services like inseparability perishability and for sure variability Banking a most transacted service is no different The relationship of service quality expectations with choice of brand is well established but in highly competitive environment where general service quality attributes are almost non variable it becomes important to understand what other constructs influence the service brand choices We in this paper attempted to explore how reference groups or country of origin influences the choice of service brands The service quality expectations are derived from the service perceptions of existing customers and word of mouth Word of mouth is more impactful when it comes from friends and family or people with

likeliness in needs of consumption This paper attempts to establish the possible relationship of reference groups influence on service expectations and choice particularly focusing on the normative and comparative influence It also attempts to check if country of origin which is so predominant in goods influences the brand choice for services The empirical study was initiated with a survey conducted on convenient sample across India on questions developed from marketing scales relating to the construct of service expectations reference group influence country of origin of two pre tested banks having most mind share one a private player another a foreign bank operating in India and lastly the choice of brands amongst the two The respondents had to rate both the banks private and foreign so that the perceptions can be dissected To analyze SPSS was used to supplement the descriptive statistics with the theory of moderation and mediation to gauge the kind of influence several reference group factors on country of origin have on the established relationship of service expectations and choice of brands We noticed through the descriptive study that while assurance and trust continue to weigh high as quality dimensions for most respondents It is also observed that people make a choice primarily because of Empathy dimension of SERVQUAL Study also revealed that there is a significant relationship between SQE and RGI and which is well moderated by age
