

Shock Case Studies

Name:

Directions: Listen to the Presentations on the Shock. Read the Case Studies and fill in your answers to the 5 questions. Submit this file to the assignment for this course.

1. You are working in the E.D. when Art, age 54, comes in accompanied by his wife. This afternoon he began vomiting and "filled the toilet" with red blood. He has also noticed black stools for the last 2 days.
Assessment data: BP 82/60, HR 120, RR 28, skin cool, Hgb 5, Hct 16

What type of shock do you suspect? (1 point)

2. While working in the cardiology clinic, you see Dorothy, age 69. She has a history of coronary disease and diabetes. She tells you that she has noticed progressive shortness of breath and dizziness, and that she always feels cold.
Assessment data: BP 78/54, HR 140 & irregular, crackles in both bases, lips cyanotic. ECG shows a new onset of atrial fibrillation with rapid ventricular response.

What type of shock do you suspect? (1 point)

3. Joe, an 18 year old football player, is brought to the urgent clinic. You are told that he sustained a blow to his head during the game tonight. He is awake and oriented, but complains of a headache and feeling like he is going to "black out".
Assessment data: BP 80/60 (hard to hear), HR 110, R 24.

What type of shock do you suspect? (1 point)

4. You are working as a camp nurse when you are called to see Lily, age 17. She fainted in the cafeteria after eating lunch. You find her lying on the floor. Her skin is ruddy looking and her face appears swollen. You can hear wheezing on expiration.

What type of shock do you suspect? (1 point)

Shock Case Studies With Answers:

Trauma Case Studies for the Paramedic Stephen J. Rahm, 2005 This text is intended to reinforce the importance of a systematic patient assessment and management approach to paramedic students by presenting them with 20 case studies on the most important trauma emergencies they are likely to encounter in the field emergencies

Medical Case Studies for the Paramedic American Academy of Orthopaedic Surgeons (AAOS), Stephen J. Rahm, 2009-04-06 Medical Case Studies for the Paramedic contains 20 case studies representing a variety of medical emergencies that the paramedic may encounter in the field Each case study begins by presenting dispatch information and a general impression of the patient upon arriving at the scene Then as the case progresses pertinent patient information is provided interspersed with a series of standardized questions designed to assess the paramedic's ability in correlating specific signs and symptoms with a particular medical condition and providing the appropriate treatment

Pediatric Case Studies for the Paramedic Stephen J. Rahm, 2006 Children are not simply adults They commonly present with unique problems that are typically not encountered in older patients These unique problems require the paramedic to alter to some degree his or her approach to the sick or injured child Because a relatively small percentage of EMS calls involve a critically ill or injured child it is common for the paramedic to experience anxiety when such a call is received Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field

Critical Care Study Guide Gerard J. Criner, Gilbert E. D'Alonzo, 2013-03-09 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and therapeutic interventions Because this knowledge base crosses many different disciplines introduction to caring for the intensive care patient while exciting may also be intimidating This textbook is designed toward making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and successful The book contains three components 1 description of the procedural tasks commonly performed for the critically ill patient 2 explanation of the most common pathophysiologic states encountered and 3 description of specific disease entities with details of their differential diagnosis diagnostic strategy and therapeutic plan This book also uses several educational approaches that we have found useful in our own teaching sessions and prior textbooks Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy As an additional study aid margin notes highlight important teaching points and facilitate easy review of chapter content To consolidate the principles outlined in each chapter review questions with full text explanations are provided at the end of each chapter All these elements help reinforce the most important messages for the reader

Study Guide for Brunner & Suddarth's Textbook of Medical-Surgical Nursing Janice L. Hinkle, Kerry H. Cheever, 2013-11-25 The perfect companion to Brunner Suddarth's Textbook of Medical Surgical

Care Plans **Pediatric Advanced Life Support Study Guide** Barbara Aehlert,2017-01-16 Fully revised to meet the 2015 CPR ECC Guidelines and to prepare students and professionals for PALS certification and recertification Pediatric Advanced Life Support Study Guide Fourth Edition provides a clear and complete approach to managing pediatric emergencies Designed for use by the spectrum of healthcare professionals the Fourth Edition provides users with the critical information needed to approach real life pediatric emergencies The Fourth Edition includes End of chapter quizzes with answers and objectives as well as a comprehensive posttest to gauge material comprehension Case studies at the end of appropriate chapters for practice with real world material application Clear procedural explanations written in descriptive yet accessible language A refined Table of Contents including standalone chapters on cardiac dysrhythmias for focused learning and study PALS Pearl boxes for text to everyday clinical application In text references for deeper research if desired Mechanical Ventilation in Emergency Medicine Susan R. Wilcox,Ani Aydin,Evie G. Marcolini,2021-11-20 This book functions as both an introduction and a refresher of fundamental mechanical ventilation concepts It reviews the core evidence based principles of ventilation and focuses on this topic as it occurs in the emergency setting covering the management from intubation until transfer to the ICU Comprehensive and concise this second edition features updated new material on blood gas analysis advanced modes of ventilation as well as a completely revamped chapter on the ventilator screen and five new case studies Additionally many of the expertly written chapters are supplemented with illustrations crafted for quick visual learning Written with the daily challenges of the emergency room in mind Mechanical Ventilation in Emergency Medicine Second Edition is an invaluable reference for all emergency health care providers Applying Pathophysiological Concepts for the NCLEX-RN®: Through an Inclusive Lens Kaveri Roy,2024-09-04 Develop clinical judgment understand the role of social determinants of health in patient care and build pathophysiological connections to decision making An inclusive guide Applying Pathophysiological Concepts for the NCLEX RN helps you understand pathophysiology principles how they relate to the social determinants of health and how they relate to improving patient care Coverage of diseases and disorders is organized by body system with each chapter including an overview of the topic a guide to study along with study tips realistic case studies and challenge questions asking you to apply your knowledge to clinical situations Written by noted nurse educator Kaveri Roy this text features a strong focus on clinical judgment that makes it a perfect study and review tool for the Next Generation NCLEX RN Overview of each body system includes the related diseases and disorders for each Case studies help you grasp pathophysiological concepts and apply clinical judgment to care based decisions Challenge guiding questions help you apply pathophysiological principles to clinical situations with answers provided at the back of the book Inclusive lens highlights how social determinants of health SDOH are indicators of disease pathways Focus on patient needs concepts enhances your understanding beyond specific medical diagnoses *Solar Wind Three* Christopher T. Russell,1974 Medical-Surgical Nursing - E-Book Sharon L. Lewis,Linda Bucher,Margaret M. Heitkemper,Mariann M. Harding,Jeffrey

Kwong, Dottie Roberts, 2016-09-08 Awarded first place in the 2017 AJN Book of the Year Awards in the Medical Surgical Nursing category. Learn how to become an exceptional caregiver in today's evolving healthcare environment. Written by a dedicated team of expert authors led by Sharon Lewis. Medical Surgical Nursing 10th Edition offers up-to-date coverage of the latest trends, hot topics, and clinical developments in the field. Completely revised and updated content explores patient care in various clinical settings and focuses on key topics such as patient safety, NCLEX exam preparation, evidence-based practice, and teamwork. A variety of helpful boxes and tables make it easy for you to find essential information, and the accessible writing style and building block approach make even the most complex concepts easy to grasp. Best of all, a complete collection of learning and study resources helps you learn more effectively and offers valuable real-world preparation for clinical practice. Highly readable format offers you a strong foundation in medical surgical nursing. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Informatics boxes discuss how technology is used by nurses and patients in healthcare settings. Expanded coverage of evidence-based practice helps you understand how to apply the latest research to real-life patient care. Expanded Safety Alerts throughout the book highlight patient safety issues and focus on the latest National Patient Safety Goals. UNIQUE Levels of Care approach explains how nursing care varies for different levels of health and illness. Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you prepare for the NCLEX examination with both standard and alternate item format questions. Unfolding case studies included throughout each assessment chapter help you apply concepts and procedures to real-life patient care. Managing Care of Multiple Patients case studies at the end of each section help you apply your knowledge of various disorders and prioritize and delegate patient care. Separate chapter on genetics focuses on the practical application to nursing care of patients. Genetics in Clinical Practice boxes address key topics such as genetic testing, Alzheimer's disease, sickle cell disease, and genetics-related ethical issues. Genetic Risk Alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders.

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition American Academy of Pediatrics (AAP), 2020-02-24. Pediatric Education for Prehospital Professionals PEPP Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition includes a new chapter on Behavioral Emergencies. A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the

streets New procedures on tourniquet application and intranasal medication administration Features Include The Pediatric Assessment Triangle PAT represents the essence of the PEPP patient assessment method which includes assessing appearance work of breathing and circulation to the skin The Patient Assessment Flowchart provides students with an easy to understand reference of the pediatric patient assessment process Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical thinking skills Procedures provide step by step explanations and visual summaries of vital BLS and ALS pediatric care skills Flexible Course Options PEPP Course Coordinators may offer a 2 day onsite course or a 1 day enhanced hybrid course at the BLS or ALS level The onsite course features interactive case based lectures where students apply their knowledge in a safe environment The hybrid course features case based online modules with engaging interactivities including rapid skills demonstration videos that students complete before attending the onsite portion for hands on skill station coaching and small group discussions The BLS level courses are geared toward emergency responders and EMTs while the ALS level courses are geared toward AEMTs and Paramedics *Refresher* Andrew N. Pollak, Carol L. Gupton, American Academy of Orthopaedic Surgeons, 2000 This groundbreaking Refresher program has been written with the experienced EMT Basic in mind offering the most pertinent information the recertifying EMT B will need The text will thoroughly prepare EMT Bs for their recertification exam If you like the Orange Book you will love this Refresher program This text thoroughly covers all of the information that is included in the National Highway Traffic Safety Administration NHTSA EMT B Refresher Curriculum and many additional topics WebCT and Blackboard are available for this program This text thoroughly covers all of the information that is included in the National Highway Traffic Safety Administration NHTSA EMT B Refresher Curriculum and many additional topics Refresher has been designed to meet the needs of EMT Bs in all settings and at all skill levels Why you should use this program for your next course Technology Resources online pre tests to help EMTs prepare for class Web links to present current information including trends in healthcare and new equipment adaptable PowerPoint presentations to help you quickly and easily prepare your class lecture Text Features a teaching and learning system unlike any other available on the market detailed case studies with questions that draw on EMTs field experiences documentation tips and teamwork tips that offer EMTs practical advice refresher review to help EMTs prepare for regional state and national recertification exams

Anatomy & Physiology for the Prehospital Provider American Academy of Orthopaedic Surgeons (AAOS), AAOS, Bob Elling, Kirsten M. Elling, 2014-05-14 Experience Navigate Today Visit <https://www.jblearning.com/navigate> to Explore an Online Demonstration Each new print copy of Anatomy Physiology for the Prehospital Provider also includes Navigate Advantage Access that unlocks a complete eBook Study Center homework and Assessment Center and a dashboard that reports actionable data World Class Medical Content To properly assess and manage a patient a prehospital provider must have a solid foundation in human anatomy and physiology Anatomy Physiology for the Prehospital Provider Second Edition uses a

systemic approach to building this foundation It begins by providing an overview of the basic systems of the human body and then explores each system in detail chapter by chapter delivering a thorough discussion on the system s anatomy physiology and pathophysiology With clear accessible language and informative illustrations the Anatomy Physiology for the Prehospital Provider Second Edition is an effective and engaging learning experience Strong Application to Real World EMS Progressive patient case studies evolve throughout every chapter offering the learner genuine context for the application of the knowledge presented This approach shows the learner how all of the information will be used to help patients in the field The Second Edition content includes New section on the basics of chemistry Expanded section on joints Expanded content on muscular physiology Updated illustrations Additional pathophysiology including cellular injury Learning Objectives The goals are set for each chapter Progressive Case Studies Each chapter includes an in depth case study Answers and rationales for the case study appear in the end of chapter section Vital Vocabulary New terminology introduced in each chapter is defined and set in boldface underlined type The complete listing of terms appears at the end of each chapter Pathophysiology Tips This feature describes common conditions seen in the field and how they are treated Safety Tips This feature provides advice on how the provider can stay safe in the field Special Needs Tips This feature provides advice on how to manage patients in specific categories such as geriatric or pediatric who require special consideration in treatment Clinical Tips This feature provides advice on the treatment of patients Full color Illustrations Highly descriptive images that enable providers to clearly visualize the finer points of human anatomy and physiology Chapter Summary Reviews key points of the chapter 2015 350 pages

New Design Concepts for High Speed Air Transport H. Sobieczky, 2014-05-04 This book presents the challenges the tools and the concepts for developing economically viable high speed civil transport aircraft under environmental constraints Computational tools for aircraft design and optimization are outlined and application in an industrial environment is shown for new and innovative case studies

Pediatric Education for Prehospital Professionals (PEPP) American Academy of Pediatrics (AAP), 2013-08-28 This work represents a comprehensive source of prehospital medical information for the emergency care of infants and children and has been designed to teach professionals how to better assess and manage ill or injured children

Brunner and Suddarth's Textbook of Medical-Surgical Nursing Mary Jo Boyer, 2010 The perfect companion to Brunner and Suddarth s Textbook of Medical Surgical Nursing this exemplary study tool helps you better understand the concepts techniques and disease processes detailed in the textbook

Paramedic Bob Elling, Kirsten M. Elling, Mikel A. Rothenberg, 2005-07 Paramedic Anatomy and Physiology utilizes a systemic approach beginning by formulating a basic picture of the human body then moving into more anatomic detail Individual chapters discuss body systems both how they function individually and together as a unit In addition to the overall picture of each system this text presents both the gross anatomy and the microscopic anatomy of vital structures

Unveiling the Magic of Words: A Report on "**Shock Case Studies With Answers**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their capability to kindle emotions, provoke contemplation, and ignite transformative change is really awe-inspiring. Enter the realm of "**Shock Case Studies With Answers**," a mesmerizing literary masterpiece penned by a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve into the book's central themes, examine its distinctive writing style, and assess its profound affect on the souls of its readers.
