Signal Processing First James H. McClellan, Ronald W. Schafer, Mark A. Yoder, 2003 For introductory courses sophomore junior in Digital Signal Processing and Signals and Systems Text is useful as a self teaching tool for anyone eager to discover more about DSP applications multi media signals and MATLAB This text is derived from DSP First A Multimedia Approach published in 1997 which filled an emerging need for a new entry level course not centered on analog circuits in the ECE curriculum It was also successfully used in 80 universities as a core text for linear systems and beginning signal processing courses This derivative product Signal Processing First SPF contains similar content and presentation style but focuses on analog signal processing Note DSP First A Multimedia Approach remains in print for those who choose a digital emphasis for their introductory course *Digital Signal Processing First, Global Edition* James H. McClellan, Ronald Schafer, Mark Yoder, 2016-07-26 For introductory courses freshman and sophomore courses in Digital Signal Processing and Signals and Systems Text may be used before the student has taken a course in circuits DSP First and its accompanying digital assets are the result of more than 20 years of work that originated from and was guided by the premise that signal processing is the best starting point for the study of electrical and computer engineering The DSP First approach introduces the use of mathematics as the language for thinking about engineering problems lays the groundwork for subsequent courses and gives students hands on experiences with MATLAB The 2nd Edition features three new chapters on the Fourier Series Discrete Time Fourier Transform and the The Discrete Fourier Transform as well as updated labs visual demos an update to the existing chapters and hundreds of new homework problems and solutions The full text downloaded to your computer With eBooks you can search for key concepts words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf available as a free download available online and also via the iPad and Android apps Upon purchase you ll gain instant access to this eBook Time limit The eBooks products do not have an expiry date You will continue to access your digital ebook products whilst you have your Bookshelf installed **Digital Signal Processing** Sanjit Kumar Mitra, 2002 Digital Signal Processing A Computer Based Approach is intended for a two semester course on digital signal processing for seniors or first year graduate students Based on user feedback a number of new topics have been added to the second edition while some excess topics from the first edition have been removed The author has taken great care to organize the chapters more logically by reordering the sections within chapters More worked out examples have also been included The book contains more than 500 problems and 150 MATLAB exercises New topics in the second edition include finite dimensional discrete time systems correlation of signals inverse systems system identification matched filter design of analog and IIR digital highpass bandpass and bandstop filters more on FIR filters spectral analysis of random signals and sparse antenna array design A corrected version of the main text is now packaged with Digital Signal Processing Laboratory Using MATLAB which is intended for a computer based

DSP laboratory course that supplements a lecture course on Digital Signal Processing The lab book includes 11 laboratory exercises with each exercise containing a number of projects to be carried out on a computer The book assumes that the reader has no background in MATLAB and teaches the reader through tested programs in the first half of the book the basics of this powerful language in solving important problems in signal processing In the second half of the book the student is asked to write the necessary MATLAB programs to carry out the projects
