Neo-Classical Physics or Quantum Mechanics? Dilip D James, 2016-10-27 There is an uncanny resemblance between Christianity in the middle ages and Physics in the twenty first century Formerly the common man could neither read nor understand the scriptures as they were written in Latin the clergy had to interpret the scriptures for the laity with predictable results Physics in the twenty first century is similar Only mathematicians with doctoral degree can understand the universe and how it works to the rest of mankind the universe is an area of darkness This is not by any means a desirable development As human beings we are all sentient individuals and as such are expected to enquire about our environment the world around us and the universe we live in On a fundamental philosophical basis it is wrong to believe that such knowledge whether by circumstance or by design is limited to a privileged few This book explains the universe for the first time in a way that is comprehensible to everyone Neo classical physics undertakes the study of the behaviour of the universe as an entity and the physics of sub atomic particles is easy to understand in everyday terms Neo classical physics is the language that sets you free free to see free to comprehend and free to wonder anew **American Book Publishing Record**
