Seeking Wisdom From Darwin To Munger Peter Bevelin:

Seeking Wisdom Peter Bevelin, 2004-03-01 Peter Bevelin begins this quest for wisdom by embarking on an ambitious journey into the Darwinian forces at the reins of human decision making illustrating just how our pre agrarian genetic hard wiring all too often leads us into disastrous lapses in judgement whether in financial transactions business decisions or in everyday life and ultimately offering us methods to sidestep error and enhance success Bevelin argues that by being aware of the driving forces behind human nature we can then more effectively approach our responsibilities in the workplace by conditioning ourselves to approach everyday problems through the logistical anchors of mathematical and scientific thinking The philosophy of Berkshire Hathaway's Director and Vice Chairman Charles Munger is offered as counterpoint to the notion that we are simply pawns of our own nature instead by actively engaging our knowledge of the natural determinants biology math physics etc and through studying diligently the philosophies of those who have weathered the storm and emerged victorious we can use this knowledge to our distinct advantage in not only business but in all walks of life
