Foundations and Applications of Intelligent Systems Fuchun Sun, Tianrui Li, Hongbo Li, 2013-11-22 These proceedings present technical papers selected from the 2012 International Conference on Intelligent Systems and Knowledge Engineering ISKE 2012 held on December 15-17 in Beijing. The aim of this conference is to bring together experts from different fields of expertise to discuss the state of the art in Intelligent Systems and Knowledge Engineering and to present new findings and perspectives on future developments. The proceedings introduce current scientific and technical advances in the fields of artificial intelligence, machine learning, pattern recognition, data mining, knowledge engineering, information retrieval, information theory, knowledge-based systems, knowledge representation and reasoning, multi-agent systems and natural language processing etc. Furthermore, they include papers on new intelligent computing paradigms which combine new computing methodologies e.g. cloud computing, service computing and pervasive computing with traditional intelligent methods. By presenting new methodologies and practices, the proceedings will benefit both researchers and practitioners who want to utilize intelligent methods in their specific fields. Dr. Fuchun Sun is a professor at the Department of Computer Science Technology, Tsinghua University, China. Dr. Tianrui Li is a professor at the School of Information Science Technology, Southwest Jiaotong University, Chengdu, China. Dr. Hongbo Li also works at the Department of Computer Science Technology, Tsinghua University, China.

Foundations of Pediatric Practice for the Occupational Therapy Assistant Jan Hollenbeck, Amy Wagenfeld, 2024-11-06. This best selling text provides an essential introduction to the theoretical foundations to clinical pediatric care within occupational therapy as well as illustrative guidance to inform its practical application for occupational therapy assistants. This new edition has been thoroughly updated to include new chapters on autism and trauma responsive care and with a greater overall emphasis on occupational performance and participation. The book aligns with the fourth edition of the OT Practice Framework as well as the AOTA 2020 Code of Ethics. Written in a succinct and straightforward style throughout, each chapter features brief vignettes drawn on the authors' own clinical experiences, case studies, and reflective activities designed to elicit discussion and exploration into the unique world of pediatric occupational therapy theory and practice. This edition also includes a new feature, In My Words, charting the experiences of caregivers and children themselves. Including chapters from some of the leading practitioners in the field and featuring color photos throughout, this will be a key resource for any occupational therapy assistant student or practitioner working with children and their caregivers.

Conceptual Foundations of Occupational Therapy Practice Gary Kielhofner, 2009-06-19. PREPARE YOUR OT STUDENTS TO BECOME OT THINKERS. Thoroughly revised and updated, the 4th Edition of this groundbreaking text traces the historical development of the foundations of modern occupational therapy theory, examines its status today, and looks to its future. Dr. Kielhofner compares and contrasts eight well-known models using diagrams to illustrate their practical applications and to highlight their similarities and differences. Well-organized chapters are supported by extensive references.

Elements of Psychophysical Theory Jean-Claude Falmagne, 2002. This book presents the basic concepts of classical psychophysics derived from Gustav Fechner as seen from the perspective of modern measurement theory. The theoretical discussion is elucidated with examples and numerous problems, and solutions to one quarter of the problems are provided in the text.

Foundations of Sensation and Perception George Mather, 2016-08-12. Do you wonder how movies' sequences of static frames appear to move or why 3D films look different from traditional movies? Why does ventriloquism work and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems: smell, taste, touch, and balance, before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes a new chapter devoted to attention and perception, over 200 new references, over 30 new figures, and

improved more colorful visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features including tutorial sections at the end of each chapter This distinctive feature introduces areas of the subject which are rarely included in student texts but are crucial for establishing a firm foundation of knowledge Some tutorials are devoted to more advanced and technical topics optics light measurement Bayesian inference but treated in an accessible manner while others cover topics a little outside of the mainstream music perception consciousness visual art Foundations of Sensation and Perception will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology neuroscience and related disciplines
