Cocoa, Chocolate and Human Health Sabine Ellinger, Benno F. Zimmermann, 2020-05-23 This book entitled Cocoa Chocolate and Human Health presents the most recent findings about cocoa and health in 14 peer reviewed chapters including nine original contributions and five reviews from cocoa experts around the world Bioavailability and metabolism of the main cocoa polyphenols i.e. the flavanols like epicatechin are presented including metabolites like valerolactones that are formed by the gut microbiome Many studies including intervention studies or epidemiological observations do not focus on single compounds but on cocoa as a whole This proves the effectiveness of cocoa as a functional food A positive influence of cocoa on hearing problems exercise performance and metabolic syndrome is discussed with mixed results the results about exercise performance are contradictory Evidence shows that cocoa flavanols may modulate some risk factors related to metabolic syndrome such as hypertension and disorders in glucose and lipid metabolism However several cardiometabolic parameters in type 2 diabetics were not affected by a flavanol rich cocoa powder as simultaneous treatment with pharmaceuticals might have negated the effect of cocoa The putative health promoting components of cocoa are altered during processing like fermentation drying and roasting of cocoa beans Chocolate the most popular cocoa product shows remarkable losses in polyphenols and vitamin E during 18 months of storage
