Reading the Canon Philipp Löffler, 2017-03-02 *Reading the Canon* explores the relation between the production of literary value and the problem of periodization tracing how literary tastes particular reader communities and sites of literary learning shape the organization of literature in historical perspective Rather than suggesting a political critique of the canon this book shows that the production of literary relevance and its tacit hierarchies of value are necessary consequences of how reading and writing are organized as social practices within different fields of literary activity *Reading the Canon* offers a comprehensive theoretical account of the conundrums still defining contemporary debates about literary value the book also features a series of historically inflected author studies from classics such as Shakespeare and Thomas Pynchon to less likely figures such as John Neal and Owen Johnson that illustrate how the idea of literary relevance has been appropriated throughout history and across a variety of national and transnational literary institutions

Indians brought their ancestors home This event along with subsequent repatriations has accelerated similar momentum across much of Native America In *All Indians Do Not Live in Teepees or Casinos* Catherine C Robbins traces this restorative effect in areas such as economic development urbanization the arts science and health care Through dozens of interviews Robbins draws out the voices of Indian people some well known and many at the grassroots level working quietly to advance their communities These voices speak against the background of the narrative s historical context The result is a rich account of Native American life in contemporary America revealing not a monolithic Indian experience of teepees or casinos but rather a mosaic of diverse peoples existing on a continuum that marks both their distinctions and their shared realities
