Radar Remote Sensing for Crop Biophysical Parameter Estimation Dipankar Mandal, Avik

Bhattacharya, Yalamanchili Subrahmanyeswara Rao, 2021-08-16 This book presents a timely investigation of radar remote sensing observations for agricultural crop monitoring and advancements of research techniques and their applicability for crop biophysical parameter estimation. It introduces theoretical background of radar scattering from vegetation volume and semi empirical modelling approaches that are the foundation for biophysical parameter inversion. The contents will help readers explore the state of the art crop monitoring and biophysical parameter estimation using approaches radar remote sensing. It is a useful guide for academicians, practitioners and policymakers.

Advances in SAR Remote Sensing of Oceans Xiaofeng Li, Huadong Guo, Kun-Shan Chen, Xiaofeng Yang, 2018-10-12 The oceans cover approximately 71% of Earth's surface, 90% of the biosphere and contain 97% of Earth's water. Since the first launch of SEASAT satellite in 1978, an increasing number of SAR satellites have or will become available such as the European Space Agency's ERS 1/2, ENVISAT and Sentinel 1 series, the Canadian RADARSAT 1/2 and the upcoming RADARSAT Constellation Mission series satellites, the Italian COSMO-SkyMed satellites, the German TERRASAR-X and TANDEM-X and the Chinese GAOFEN 3 SAR, among others. Recently, the European Space Agency has launched a new generation of SAR satellites, Sentinel 1A in 2014 and Sentinel 1B in 2016. These SAR satellites provide researchers with free and open SAR images necessary to carry out their research on the global oceans. The scope of *Advances in SAR Remote Sensing of Oceans* is to demonstrate the types of information that can be obtained from SAR images of the oceans and the cutting edge methods needed for analysing SAR images. Written by leading experts in the field and divided into four sections, the book presents the basic principles of radar backscattering from the ocean surface, introduces the recent progresses in SAR remote sensing of dynamic coastal environment and management, discusses the state of the art methods to monitor parameters or phenomena related to the dynamic ocean environment and deals specifically with new techniques and findings of marine atmospheric boundary layer observations. *Advances in SAR Remote Sensing of Oceans* is a very comprehensive and up to date reference intended for use by graduate students, researchers, practitioners and R & D engineers working in the vibrant field of oceans interested to understand how SAR remote sensing can support oceanography research and applications.

Harbour Protection Through Data Fusion Technologies

Elisa Shahbazian, Galina Rogova, Michael J. de Weert, 2008-12-03 An Advanced Research Workshop (ARW) Data Fusion Technologies for Harbour Protection was held in Tallinn, Estonia, 27 June - 1 July 2005. This workshop was organized by request of the NATO Security Through Science Programme and the Defence Investment Division. An ARW is one of many types of funded group support mechanisms established by the NATO Science Committee to contribute to the critical assessment of existing knowledge on new important topics, to identify directions for future research and to promote close working relationships between scientists from different countries and with different professional experiences. The NATO Science

Committee was approved at a meeting of the Heads of Government of the Alliance in December 1957 subsequent to the 1956 recommendation of Three Wise Men Foreign Ministers Lange Norway Martino Italy and Pearson Canada on Non Military Cooperation in NATO The NATO Science Committee established the NATO Science Programme in 1958 to encourage and support scientific collaboration between individual scientists and to foster scientific development in its member states In 1999 following the end of the Cold War the Science Programme was transformed so that support is now devoted to collaboration between Partner country and NATO country scientists or to contributing towards research support in Partner countries Since 2004 the Science Programme was further modified to focus exclusively on NATO Priority Research Topics i e Defence Against Terrorism or Countering Other Threats to Security and also preferably on a Partner country priority area
