Signals And Systems Uday Kumar Text:

Innovations in Signal Processing and Embedded Systems Jyotsna Kumar Mandal, Mike Hinchey, K. Sreenivas Rao, 2022-09-13 This book covers four sections such as artificial intelligence and machine learning VLSI and signal processing robotics and automation and communications and networking This book is a collection of selected papers presented at the First International Conference on Innovations in Signal Processing and Embedded Systems ICISPES 2021 organized by MLR Institute of Technology Hyderabad India during October 22 23 2021 The topics covered are advanced communication technologies IoT based systems and applications application AI in computer vision natural language processing reinforcement learning ANN and deep neural networks RNN GAN CNN and RBM SOC NOC design VLSI and CAD CAM cross layer design fault tolerance and computation theories FPGA in outer space nanotechnology semiconductor technology signal and image processing high performance computing pattern recognition and computer vision innovations in robotics reconfigurable robots and MEMS NEMS

Handbook of Industry 4.0 and SMART Systems Diego Galar Pascual, Pasquale Daponte, Uday Kumar, 2019-09-17 Industry 4.0 refers to fourth generation of industrial activity characterized by smart systems and internet based solutions This book describes the fourth revolution based on instrumented interconnected and intelligent assets The different book chapters provide a perspective on technologies and methodologies developed and deployed leading to this concept With an aim to increase performance productivity and flexibility major application area of maintenance through smart system has been discussed in detail Applicability of 4.0 in transportation energy and infrastructure is explored with effects on technology organisation and operations from a systems perspective

SIGNALS AND SYSTEMS, Third Edition KUMAR, A. ANAND, 2013-09-13 The Third Edition of this well received text continues to provide coherent and comprehensive coverage of signals and systems It is designed for undergraduate students of electronics and communication engineering telecommunication engineering electronics and instrumentation engineering and electrical and electronics engineering The book will also be useful to AMIE and IETE students Written with student centred pedagogically driven approach the text provides a self contained introduction to the theory of signals and systems This book looks at the concepts of systems and also examines signals and the way that signals interact with physical systems It covers topics ranging from basic signals and systems to signal analysis properties of continuous time Fourier transforms including Fourier transforms of standard signals signal transmission through linear systems relation between convolution and correlation of signals sampling theorems and techniques and transform analysis of LTI systems All the solved and unsolved problems in this book are designed to illustrate the topics in a clear way New to This Edition MATLAB Programs at the end of each chapter Key Features Numerous worked out examples in each chapter Short questions with answers help students to prepare for examinations Objective type questions and unsolved problems at the end of each chapter to test the level of understanding of the subject

Prognostics and Remaining Useful Life (RUL) Estimation

Diego Galar,Kai Goebel,Peter Sandborn,Uday Kumar,2021-12-27 Maintenance combines various methods tools and techniques in a bid to reduce maintenance costs while increasing the reliability availability and security of equipment Condition based maintenance CBM is one such method and prognostics forms a key element of a CBM program based on mathematical models for predicting remaining useful life RUL Prognostics and Remaining Useful Life RUL Estimation Predicting with Confidence compares the techniques and models used to estimate the RUL of different assets including a review of the relevant literature on prognostic techniques and their use in the industrial field This book describes different approaches and prognosis methods for different assets backed up by appropriate case studies FEATURES Presents a compendium of RUL estimation methods and technologies used in predictive maintenance Describes different approaches and prognosis methods for different assets Includes a comprehensive compilation of methods from model based and data driven to hybrid Discusses the benchmarking of RUL estimation methods according to accuracy and uncertainty depending on the target application the type of asset and the forecast performance expected Contains a toolset of methods and a way of deployment aimed at a versatile audience This book is aimed at professionals senior undergraduates and graduate students in all interdisciplinary engineering streams that focus on prognosis and maintenance *AI and Machine Learning Impacts in Intelligent Supply Chain* Pandey, Binay Kumar,Kanike, Uday Kumar,George, A. Shaji,Pandey, Digvijay,2024-01-29 Businesses are facing an unprecedented challenge the urgent need to adapt and thrive in a world where intelligent factories and supply chains are the new norm The digital transformation of supply chains is essential for staying competitive but it is a complex journey fraught with uncertainties How can organizations harness the power of emerging technologies like Artificial Intelligence AI and Machine Learning ML to increase profitability cut supply chain costs elevate customer service and optimize their networks The answers to these questions are crucial for business survival and success AI and Machine Learning Impacts in Intelligent Supply Chain is a groundbreaking book that offers a comprehensive solution to the challenges posed by the Industry 4 0 revolution This book is your indispensable guide to navigating the intricate world of supply chain digital transformation using innovative technologies It provides real world examples and insights that illustrate how AI and ML are the keys to solving complex supply chain problems from inventory management to route optimization and beyond Whether you are an academic scholar seeking to delve into the impact of AI and ML on supply chain management or a business leader striving to gain a competitive edge this book is tailored to meet your needs Robots, Drones, UAVs and UGVs for Operation and Maintenance Diego Galar,Uday Kumar,Dammika Seneviratne,2020-05-07 Industrial assets such as railway lines roads pipelines are usually huge span long distances and can be divided into clusters or segments that provide different levels of functionality subject to different loads degradations and environmental conditions and their efficient management is necessary The aim of the book is to give comprehensive understanding about the use of autonomous vehicles context of robotics for the utilization of inspection and maintenance activities in industrial asset management in different

accessibility and hazard levels The usability of deploying inspection vehicles in an autonomous manner is explained with the emphasis on integrating the total process Key Features Aims for solutions for maintenance and inspection problems provided by robotics drones unmanned air vehicles and unmanned ground vehicles Discusses integration of autonomous vehicles for inspection and maintenance of industrial assets Covers the industrial approach to inspection needs and presents what is needed from the infrastructure end Presents the requirements for robot designers to design an autonomous inspection and maintenance system Includes practical case studies from industries

Utilization of AI Technology in Supply Chain

Management Pandey, Digvijay, Pandey, Binay Kumar, Kanike, Uday Kumar, George, A. Shaji, Kaur, Prabjot, 2024-03-01 The surge in digital transformation and the integration of innovative technologies into manufacturing processes have given rise to a pressing issue in supply chain management Businesses are in dire need of solutions to navigate this complexity and harness the true potential of intelligent supply chains Utilization of AI Technology in Supply Chain Management is a comprehensive guide tailored for academic scholars seeking to unravel the mysteries of artificial intelligence AI and machine learning ML in the context of supply chain management Amid the hype surrounding AI and ML there exists a critical need to bridge the gap between human expertise and technological advancements Utilization of AI Technology in Supply Chain Management addresses this necessity by delving into real world instances where teams have successfully employed these innovative technologies to enhance supply chain performance reduce inventory and optimize routes The adoption of AI and ML is not just a trend it is the cornerstone of digital acceleration initiatives making it imperative for scholars to understand and leverage these technologies effectively

Quality, IT and Business Operations

P.K. Kapur, Uday Kumar, Ajit Kumar Verma, 2017-10-01 This book discusses action oriented concise and easy to communicate goals and challenges related to quality reliability infocomm technology and business operations It brings together groundbreaking research in the area of software reliability e maintenance and big data analytics highlighting the importance of maintaining the current growth in information technology IT adoption in businesses while at the same time proposing process innovations to ensure sustainable development in the immediate future In its thirty seven chapters it covers various areas of e maintenance solutions software architectures patching problems in software reliability preventive maintenance industrial big data and reliability applications in electric power systems The book reviews the ways in which countries currently attempt to resolve the conflicts and opportunities related to quality reliability IT and business operations and proposes that internationally coordinated research plans are essential for effective and sustainable development with research being most effective when it uses evidence based decision making frameworks resulting in clear management objectives and is organized within adaptive management frameworks Written by leading experts the book is of interest to researchers academicians practitioners and policy makers alike who are working towards the common goal of making business operations more effective and sustainable

AI Factory
Ramin Karim, Diego Galar, Uday Kumar, 2023-05-24 This book provides insights into how to approach and utilise data science

tools technologies and methodologies related to artificial intelligence AI in industrial contexts It explains the essence of distributed computing and AI technologies and their interconnections It includes descriptions of various technology and methodology approaches and their purpose and benefits when developing AI solutions in industrial contexts In addition this book summarises experiences from AI technology deployment projects from several industrial sectors Features Presents a compendium of methodologies and technologies in industrial AI and digitalisation Illustrates the sensor to actuation approach showing the complete cycle which defines and differentiates AI and digitalisation Covers a broad range of academic and industrial issues within the field of asset management Discusses the impact of Industry 4 0 in other sectors Includes a dedicated chapter on real time case studies This book is aimed at researchers and professionals in industrial and software engineering network security AI and machine learning ML engineering managers operational and maintenance specialists asset managers and digital and AI manufacturing specialists

Information Systems Design and Intelligent

Applications Suresh Chandra Satapathy,Vikrant Bhateja,Radhakrishna Somanah,Xin-She Yang,Roman Senkerik,2018-12-30 The book gathers a collection of high quality peer reviewed research papers presented at the International Conference on Information System Design and Intelligent Applications INDIA 2018 which was held at the Universite des Mascareignes Mauritius from July 19 to 21 2018 It covers a wide range of topics in computer science and information technology from image processing database applications and data mining to grid and cloud computing bioinformatics and many more The intelligent tools discussed e g swarm intelligence artificial intelligence evolutionary algorithms and bio inspired algorithms are currently being applied to solve challenging problems in various domains

Soft-Computing-Based Nonlinear Control Systems Design Singh, Uday Pratap,Tiwari, Akhilesh,Singh, Rajeev Kumar,2018-02-09 A critical part of ensuring that systems are advancing alongside technology without complications is problem solving Practical applications of problem solving theories can model conflict and cooperation and aid in creating solutions to real world problems Soft Computing Based Nonlinear Control Systems Design is a critical scholarly publication that examines the practical applications of control theory and its applications in problem solving to fields including economics environmental management and financial modelling Featuring a wide range of topics such as fuzzy logic nature inspired algorithms and cloud computing this book is geared toward academicians researchers and students seeking relevant research on control theory and its practical applications

Current Trends in Reliability, Availability, Maintainability and Safety Uday Kumar,Alireza Ahmadi,Ajit Kumar Verma,Prabhakar Varde,2015-12-14 Containing selected papers from the ICRESH ARMS 2015 conference in Lulea Sweden collected by editors with years of experiences in Reliability and maintenance modeling risk assessment and asset management this work maximizes reader insights into the current trends in Reliability Availability Maintainability and Safety RAMS and Risk Management Featuring a comprehensive analysis of the significance of the role of RAMS and Risk Management in the decision making process during the various phases of design

operation maintenance asset management and productivity in Industrial domains these proceedings discuss key issues and challenges in the operation maintenance and risk management of complex engineering systems and will serve as a valuable resource for those in the field

Soft Computing and Signal Processing V. Sivakumar Reddy,V. Kamakshi Prasad,Jiacun Wang,K. T. V. Reddy,2020-03-13 This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Second International Conference on Soft Computing and Signal Processing ICSCSP 2019 The respective contributions address topics such as soft sets rough sets fuzzy logic neural networks genetic algorithms and machine learning and discuss various aspects of these topics e g technological considerations product implementation and application issues

International Congress and Workshop on Industrial AI and eMaintenance 2023 Uday Kumar,Ramin Karim,Diego Galar,Ravdeep Kour,2024-01-01 This proceedings brings together the papers presented at the International Congress and Workshop on Industrial AI and eMaintenance 2023 IAI2023 The conference integrates the themes and topics of three conferences Industrial AI the increasing convergence between OT operational technologies and IT information technologies last but not least the unabated fast paced developments of advanced analytics However numerous technical and organizational challenges to the widespread development of industrial AI still exist The IAI2023 conference and its proceedings foster fruitful discussions between AI creators and industrial practitioners

Congress on Intelligent Systems Harish Sharma,Mukesh Saraswat,Anupam Yadav,Joong Hoon Kim,Jagdish Chand Bansal,2021-06-01 This book is a collection of selected papers presented at the First Congress on Intelligent Systems CIS 2020 held in New Delhi India during September 5 6 2020 It includes novel and innovative work from experts practitioners scientists and decision makers from academia and industry It covers topics such as Internet of Things information security embedded systems real time systems cloud computing big data analysis quantum computing automation systems bio inspired intelligence cognitive systems cyber physical systems data analytics data web mining data science intelligence for security intelligent decision making systems intelligent information processing intelligent transportation artificial intelligence for machine vision imaging sensors technology image segmentation convolutional neural network image video classification soft computing for machine vision pattern recognition human computer interaction robotic devices and systems autonomous vehicles intelligent control systems human motor control game playing evolutionary algorithms swarm optimization neural network deep learning supervised learning unsupervised learning fuzzy logic rough sets computational optimization and neuro fuzzy systems

Communication and Intelligent Systems Harish Sharma,Vivek Shrivastava,Ashish Kumar Tripathi,Lipo Wang,2025-09-30 This book gathers selected research papers presented at the Sixth International Conference on Communication and Intelligent Systems ICCIS 2024 organized by Maulana Azad National Institute of Technology MANIT Bhopal India during November 8 9 2024 This book presents a collection of state of the art research work involving cutting edge technologies for communication and intelligent systems Over the past few years advances in artificial intelligence and

machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies The book presents single and multi disciplinary research on these themes to make the latest results available in a single readily accessible source The work is presented in four volumes **Signals and Systems** I. Ravi Kumar,2009 *Official Gazette of the United States Patent and Trademark Office* United States. Patent and Trademark Office,1999 **AgriTech Revolution** Siddharth Singh Chouhan,Rajneesh Kumar Patel,Uday Pratap Singh,Sanjeev Jain,2025-10-27 This book explores how modern technologies are changing the way we farm and produce food It brings together a wide range of smart farming tools and digital solutions that are shaping the future of agriculture The book covers both the opportunities and challenges that come with using technology in farming and offers practical solutions The chapters begin with an introduction to the AgriTech revolution and the basic concepts of agricultural technology It then explores precision agriculture and how computer vision IoT and artificial intelligence are helping farmers improve productivity Readers will also learn about robotics automation data analytics and data visualization in agriculture Other chapters discuss the role of blockchain in the supply chain remote sensing and smart greenhouses The final chapters focus on sustainability and future trends in AgriTech This book is a valuable resource for students researchers academicians and professionals who want to understand how advanced technologies are applied in modern farming It will also benefit those interested in building solutions for digital agriculture and smart farming systems *Machine Learning Models and Architectures for Biomedical Signal Processing* Suman Lata Tripathi,Valentina Emilia Balas,Mufti Mahmud,Soumya Banerjee,2024-11-05 Machine Learning Models and Architectures for Biomedical Signal Processing presents the fundamental concepts of machine learning techniques for bioinformatics in an interactive way The book investigates how efficient machine and deep learning models can support high speed processors with reconfigurable architectures like graphic processing units GPUs Field programmable gate arrays FPGAs or any hybrid system This great resource will be of interest to researchers working to increase the efficiency of hardware and architecture design for biomedical signal processing and signal processing techniques Covers the hardware architecture implementation of machine learning algorithms Discusses the software implementation approach and the efficient hardware of machine learning application with FPGA Presents the major design challenges and research potential in machine learning techniques
