Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method Laner Cassar, 2020-06-07 Jung s Technique of Active Imagination and Desoille s Directed Waking Dream Method brings together Carl Jung s active imagination and Robert Desoille s r ve veill dirig directed waking dream method RED It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences proposing an integrated framework of clinical practice The book aims to study the wider European context of the 1900s which influenced the development of both Jung s and Desoille s methods This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional concept of inner psychic space in the waking dreams of Jung s active imagination and Desoille s RED It also attempts a broader theoretical comparison between the procedural

aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches This book is a unique contribution to analytical psychology and will be of great interest for academics researchers and post graduate students interested in the use of imagination and mental imagery in analysis psychotherapy and counselling The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works This book was a Gradiva Award nominee for 2021 Jung on Active Imagination C. G. Jung, 2015-02-17 All the creative art psychotherapies art dance music drama poetry can trace their roots to C G Jung's early work on active imagination Joan Chodorow here offers a collection of Jung's writings on active imagination gathered together for the first time Jung developed this concept between the years 1913 and 1916 following his break with Freud During this time he was disoriented and experienced intense inner turmoil he suffered from lethargy and fears and his moods threatened to overwhelm him Jung searched for a method to heal himself from within and finally decided to engage with the impulses and images of his unconscious It was through the rediscovery of the symbolic play of his childhood that Jung was able to reconnect with his creative spirit In a 1925 seminar and again in his memoirs he tells the remarkable story of his experiments during this time that led to his self healing Jung learned to develop an ongoing relationship with his lively creative spirit through the power of imagination and fantasies He termed this therapeutic method active imagination This method is based on the natural healing function of the imagination and its many expressions Chodorow clearly presents the texts and sets them in the proper context She also interweaves her discussion of Jung's writings and ideas with contributions from Jungian authors and artists *Jung on Active Imagination* Carl Gustav Jung, 1997 Jungian analyst Joan Chodorow brings together a key selection of Jung's writings on active imagination In her introduction she clearly explains Jung's methods of achieving self knowledge and individuation *Jung and the Alchemical Imagination* Jeffrey Raff, 2000-11-15 Jung and the Alchemical Imagination illustrates the spiritual nature of Jungian psychology and the debt it owes to the tradition of esoteric religion Unlike other books on Jung and alchemy which contain a psychological interpretation of alchemical material this work uses alchemy to understand the three cornerstones of Jungian spirituality the self the transcendent function and active imagination Through the interpretation of alchemical imagery Raff explains the nature of these three concepts and illustrates how together they form a new model of contemporary Western spirituality This book is also unique in selecting alchemical texts for analysis that are relatively unknown and which for the most part have never been interpreted In addition he presents two new concepts the ally and the psychoid realm Through the addition of these ideas and the new understanding that they offer it is possible to apply alchemical imagery to transpsychic experience that is to a world of spirits which may not be reduced to psychological concepts By including this realm in the study of alchemy and Jungian thought it is possible to gain insights into the nature of visionary and ecstatic experiences that form part of the path of individuation the road to completion Jung's

Alchemical Philosophy Stanton Marlan, 2022-04-27 Winner of the IAJIS Book Award 2023 for Best Theoretical Book

The Red Book: Reflections on C.G. Jung's Liber Novus Thomas Kirsch, George Hogenson, 2017-09-19 In 2009 WW Norton

published *The Red Book* a book written by Jung in 1913-1914 but not previously published. Snippets of information about the likely contents of the Red Book had been in circulation for years and there was much debate and eager anticipation of its publication within the Jungian field and the larger reading public. In 2010 a conference was held at the San Francisco Jungian Institute which brought together an international group of distinguished scholars in analytical psychology to explore and address critical contextual aspects of *The Red Book* and to debate its importance for current and future Jungian theory and practice. *The Red Book Reflections on C.G. Jung's Liber Novus* is based on that conference; the individual papers have been thoroughly revised and updated for this book and address some of the important questions and issues that were raised at that conference in response to the presentation of these papers. As yet there has been very little published about *The Red Book*. *The Red Book Reflections on C.G. Jung's Liber Novus* will contribute to setting the agenda for further research, both scholarly and clinical, in response to Jung's account of his experiences between 1913-1914 when arguably the future course of his entire project was set in motion. This book will be essential reading for any Jungian interested in the importance of *The Red Book*, analytical psychologists, trainee analysts, those with an interest in the history of ideas and historians.

Jungian Literary Criticism

Susan Rowland,2018-10-04 In Jungian Literary Criticism the essential guide Susan Rowland demonstrates how ideas such as archetypes the anima and animus the unconscious and synchronicity can be applied to the analysis of literature Jung s emphasis on creativity was central to his own work and here Rowland illustrates how his concepts can be applied to novels poetry myth and epic allowing a reader to see their personal psychological and historical contribution This multidisciplinary and transdisciplinary approach challenges the notion that Jungian ideas cannot be applied to literary studies exploring Jungian themes in canonical

texts by authors including Shakespeare Jane Austen and W B Yeats as well as works by twenty first century writers such as in digital literary art Rowland argues that Jung s works encapsulate realities beyond narrow definitions of what a single academic discipline ought to do and through using case studies alongside Jung s work she demonstrates how both disciplines find a home in one another Interweaving Jungian analysis with literature Jungian Literary Criticism explores concepts from the shadow to contemporary issues of ecocriticism and climate change in relation to literary works and emphasises the importance of a reciprocal relationship Each chapter concludes with key definitions themes and further reading and the book encourages the reader to examine how worldviews change when disciplines combine The accessible approach of Jungian Literary Criticism the essential guide will appeal to academics and students of literary studies Jungian and post Jungian studies literary theory environmental humanities and ecocentrism It will also be of interest to Jungian analysts and therapists in training and in practice
