Development And Curriculum Planning 2nd Edition

Joel M. Levine

Development And Curriculum Planning 2nd Edition:

Focused Observations Gaye Gronlund, Marlyn James, 2013-07-15 Intentional teaching begins with focused observations and systematic documentation of children's learning and development. This book is filled with tools and techniques designed to help early childhood educators purposefully observe children, create portfolios with rich documentation, and plan curriculum that supports every child. Discussion questions, observation practice exercises, and reflection assignments are included, as well as a DVD with classroom vignettes showcasing observation techniques. Gaye Gronlund is an early childhood education consultant who trains early childhood educators across the country. Marlyn James is an education and early childhood professor.

Resources in Education, 1994 Research in Education, 1969 **Cumulative Book Index**, 1925 A world list of books in the English language

Infants and Toddlers Deiner, 2008-03 This book takes research-based practice to a new height by providing the evidence as well as the application of material to develop better practitioners. It is an up-to-date comprehensive view of infant and toddler development and how development serves as the basis for curricular planning. It provides specific chapters on inclusive curriculum planning for infants from birth to 8 months, 8 to 18 months, and 18 months to 3 years, in addition to chapters on childcare and general curricular planning. With a family-centered approach, the text highlights some of the cultural challenges in the field and some of the issues that families and children are facing. It considers the challenges vulnerable families face as they rear infants and toddlers and the challenges society itself faces in helping all infants and toddlers to reach their potential. Its organization has a domain-specific approach: language, cognitive, and so on, to highlight learning in these areas but also presents together to address the whole child. It supports pre-service teachers in developing a personal philosophy of teaching and reflecting on their practice as a way of improving it. This text also tells the story of the people behind the practice: mothers in labor, fathers caring for young children, childcare providers, grandparents, and the infants and toddlers themselves. It is a text that challenges students to expand their knowledge while providing the bridge to meet the challenges in the field.

Planning & Changing, 1986 **American Book Publishing Record Cumulative, 1950-1977** R.R. Bowker Company. Department of Bibliography, 1978 **Secondary Instruction** Joel M. Levine, 1989 **The Curriculum** Landon E. Beyer, Michael W. Apple, 1988-01-01 This book examines six major areas of theory and practice that exemplify the field of curriculum: the historical dimensions of the field, planning and organizing the curricula for the public schools, the problem of selecting appropriate content for inclusion in the curriculum, the effect of the workplace of teaching on curriculum theory and development, technology and curriculum, and problems of evaluation. Multiple perspectives are included within each of these major areas, and the various authors help to disentangle both the political and ethical differences among competing perspectives. Beyer and Apple's book extends the scope of recent critically oriented work in the curriculum field, clarifying both the conceptual and practical dimensions of curriculum decision making.
