Environment Policy of the Asian Development Bank Asian Development Bank,2002 *Capacity Building for Environmental Law in the Asian and Pacific Region* Donna G. Craig,Nicholas A. Robinson,Kheng Lian Koh,2003 National sectoral and international approaches to environmental law education are integrated in this comprehensive resource on environmental law in Asian and Pacific countries A broader definition of sustainable development that incorporates social cultural and economic dimensions facilitates consideration of social justice and equity in environmental law Specific environments including freshwater ecosystems forests and intercoastal zones are discussed in this volume including information on biological diversity climate change and sustainable development **Better Models for Superstores** Constance Epton Beaumont,1997 ISTF News ,2004 **World Development Report 1992** World Bank,1992 Now in its fifteenth annual edition the World Development Report 1992 is an essential reference on the world economy and the state of social and economic development Like earlier editions the 1992 Report incorporates research from all over the world analyzing the conditions that surround the growth process and offering insights on appropriate policy measures for the future This edition focuses on environmental issues analyzing key linkages between the natural environment and economic growth population and poverty and assessing policy and program options for promoting sustainable development and good stewardship of natural resources A timely survey and synthesis of contemporary economic issues worldwide the World Development Report 1992 is invaluable to anyone interested in or concerned with economic development international economics and international politics **Institutions and Sustainable Development** John Gordon,1991 **World Development Report** ,1992 This is the fifteenth in the annual series assessing major development issues The World Development Report 1992 explores the links between economic development and the environment The 1990 report on poverty last year s report on development strategies and this report constitute a trilogy on the goals and means of development The main message of this year s report is the need to integrate environmental considerations into development policymaking The report argues that continued and even accelerated economic and human development is sustainable and can be consistent with improving environmental conditions but that this will require major policy program and institutional

shifts A twofold strategy is required First the positive links between efficient income growth and the environment need to be aggressively exploited Second strong policies and institutions need to be put in place which cause decision makers to adopt less damaging forms of behavior Where tradeoffs exist between income growth and environmental quality the report argues for a careful assessment of the costs and benefits of alternative policies This approach will result in much less environmental damage Like its predecessors this report includes the World Development Indicators which offer selected social and economic statistics on 125 countries Better Environmental Decisions Ken Sexton,1999 Better Environmental Decisions brings together leading scholars and practitioners from business government and communities to provide a comprehensive interdisciplinary introduction to the new landscape of environmental regulation and agreements Each chapter describes an important aspect of environmental decision making identifies key issues problems and barriers and recommends ways to improve both the process and the final result Throughout contributors focus on providing tools to make better decisions and on presenting solutions to real world problems This useful work will be a landmark reference and text for scholars and students as well as legislators regulators advocates and community activists Agriculture + Rural Development ,2000
