Post-conflict Disarmament, Demobilization and Reintegration Dr Antonio Giustozzi, 2013-04-28 This book revisits post Cold War Disarmament Disintegration and Reintegration DDR programmes in the light of previous experiences of disarmament demobilisation and reintegration In the history of North America and Europe in particular such programmes had a major impact on state building contributing to the development of the welfare state shaping political settlements and directing government policy to maintain social peace The authors in this important book ask what is left of these state building dimensions in contemporary DDR programmes and whether the constraints imposed by international organisations on DDR programmes have more negative effects than positive ones The role of political leadership in DDR processes is highlighted can bureaucratically driven processes deliver success Only if political elites take full control and manage DDR programmes can there be a lasting impact on state building Even then most political elites avoid deep changes in their relationship with the veterans Is there a chance of reshaping international intervention in such a way as to favour the development of a social contract between political elites and veterans In taking a historical perspective this book is unique in the existing literature on DDR and will be essential reading for policy makers students and scholars of conflict studies and those working in NGOs particularly donor agencies This volume was produced with the contribution of the Crisis States Research Centre LSE

Postwar Recovery Alpaslan Ozerdem, 2009 Though conflict has been the focus of much academic attention the processes of recovering from war and conflict have been little studied Confusion still exists as to whether post war reconstruction is concerned with relief or development with physical rebuilding economic recovery social reintegration or political reconstruction The result is an all too frequent fragmentation and waste of effort on the ground An understanding of the need to plan and integrate the many different activities for reconstruction and recovery within a shared vision is therefore crucial The International Library of Post war Reconstruction and Development will set out a conceptual and strategic framework for post war reconstruction practice at the same time exploring and illustrating specific aspects of practice for those working in the field or training to do so The series will also act as a focus for a continuing dialogue between academics and practitioners at the forefront of developing the discipline

Disarmament, Demobilization, and Reintegration Desmond Molloy, 2017 Disarmament demobilization and reintegration or DDR has been widely advocated for decades as an essential component of postconflict peacebuilding But DDR in practice has generated more questions than answers Does the approach work contributing to postconflict stabilization and the reintegration of former combatants Can it work better What constitutes success What accounts for failures Do the potential risks outweigh the potential benefits Drawing on his extensive experience in the field Desmond Molloy considers these questions and more as he traces the evolution of DDR theory and practice from the mid 1980s to the present Publisher's website

Disarmament, Demobilization and Reintegration and Security Sector Reform Alan

Bryden,Vincenza Scherrer,2012 This book sets out to break down and identify positive associations between Disarmament Demobilization and Reintegration DDR and Security Sector Reform SSR Drawing on case studies from selected post conflict settings the book demonstrates the potential and reality of improved collaboration between both endeavors Enhanced cooperation could avoid negative outcomes such as former combatants dropping out of programs trust undermined in security institutions and the creation of security vacuums that jeopardize the safety of individuals and communities A central claim of the book is that programs must be responsive to the needs and interests of different national actors Without understanding the dynamic political processes that shape the origins parameters and outcomes of both processes DDR and SSR may address security deficits but will be unfit to support sustainable transitions towards national recovery and development Series Geneva Centre for the Democratic Control of Armed Forces DCAF

Disarmament, Demobilization, and Reintegration Raymond A. Millen,2019-10-25 Disarmament demobilization and reintegration DDR programs represent a major challenge for practitioners because they require meticulous planning extensive resources and an extended period of time While the US military theoretically possesses the organization planning capacity resources and funding to implement DDR assuming this responsibility unassisted would be an inferior strategy Implementing DDR is both a security and a confidence building challenge Government and rebel forces wish to stop fighting but fear for their safety before disarming and demobilizing The DDR program creates an environment for former combatants both insurgent and government forces to participate freely Several procedures and control measures are necessary to allay perceived threats to security A US policy decision to initiate a DDR program reflects its commitment to a country s long term stability The amount of effort also evinces the degree of US interest in the concerned country An effective DDR program serves as the gateway to security

sector reform SSR which is a long term program to enhance a country's stability. If DDR falters, SSR is much more difficult to implement. As this primer reveals, DDR programs are difficult, resource demanding, and time intensive. The most important phase, reintegration, is rarely completed due to funding limitations, untapped resources, and time constraints. In terms of expectations and trust, a DDR program has a short window of opportunity for implementation. If the program is disorganized or plagued by delays, DDR participants will likely leave in frustration without the benefit of reintegration. One of the goals of this primer is to suggest ways to optimize available funds, resources, and time. This DDR primer addresses shaping activities prior to implementing a DDR program to include the prerequisite of a peace agreement in the traditional approach and the all-important public information campaign. The main body of the primer focuses on the planning and implementation of DDR. The primer concludes with the option of a DDR support center for the purpose of increasing coordination, cooperation, and collaboration among stakeholders and the US military.

United Nations Led Disarmament, Demobilization and Reintegration (DDR) in the Eastern Democratic Republic of Congo Tristan M. Allen, 2011. The United Nations Organization Mission in the Democratic Republic of the Congo (MONUC) was deployed following the signing of the Lusaka Ceasefire Agreement in July of 1999. A core pillar of the mission is disarmament, demobilization, and reintegration (DDR). Programs have attempted to address the issue of multiple armed nonstate actors operating primarily in the country's eastern districts of Ituri North and South Kivu. MONUC's DDR initiatives can be subdivided into the national DDR program for Congolese combatants and the disarmament, demobilization, repatriation, reintegration, and resettlement (DDRRR) of foreign armed groups. Although there has been some success in the DDR programs over the past 12 years of UN deployment, rampant insecurity attributed to the presence of armed groups in the DRC continues to plague the east. An examination of the DDR process in the east reveals that although the UN has assisted in the implementation of large multidimensional DDR and DDRRR programs in the east, the situational context, voluntary approach, and links to Security Sector Reform (SSR) have all proven inadequate to achieving stability through DDR.

Disarmament, Demobilization, and Reintegration Programs for Military Practitioners Raymond Millen, Noa Seligsohn, 2021-05-31 Disarmament demobilization and reintegration DDR programs pose daunting challenges As Dr Raymond Millen notes the political military context at the end of a conflict requires due deliberation since DDR programs are not suitable in every instance They are difficult enough to implement even under favorable circumstances so the US government should not view DDR programs as a panacea for all post war environments In too many instances the conduct of DDR has been rather slapdash then pawned off to security sector reform as a recourse Such an abrogation of responsibility hampers security sector reform activities resulting in greater expense and time Disarmament Demobilization and Reintegration Programs for Military Practitioners serves as a guide for organizing planning preparing and executing activities in support of such operations As the book underscores the military s supporting role is not passive instead it practices active engagement by incorporating the experience and expertise of DDR partners Achieving a sense of teamwork among diverse organizational cultures requires creative thinking While recognizing that DDR is essentially a civilian led venture the military can furnish key enablers that enhance performance and effectiveness PKSOI regards this book as a valuable reference for military and civilian organizations coming together to implement meaningful DDR

DDR and SSR in War-to-Peace Transition Christopher von Dyck, 2016-05-03 While disarmament demobilization and reintegration DDR and security sector reform SSR have become integral statebuilding tools in post conflict states the existing empirical literature examining their relationship has focused on supply side considerations related to the programming of both processes In practice though DDR and SSR are implemented in the wider context of war to peace transitions where the state is attempting to establish a monopoly over the use of force and legitimize itself in the eyes of domestic and international communities This paper therefore assumes that to identify opportunities and constraints for establishing closer practical linkages between DDR and SSR it is important to take the local politics into consideration It examines two past externally driven peacebuilding interventions in West Africa namely Liberia and Sierra Leone featuring cases in which the central state had essentially fragmented or collapsed Through this comparative analysis the paper aims to provide a stepping stone for future studies examining demand side considerations of DDR and SSR in post conflict contexts

Demobilization, Disarmament and Reintegration (DDR) Amal Hussein Alwan Shimir, 2021 This thesis offers a theoretical review of the literature related to the practices of Disarmament Demobilization and Reintegration DDR a strategy for addressing the status of former armed fighters in post conflict societies and proposes a new DDR approach fluid DDR with reference to the case of Iraq Fluid DDR is a more flexible approach to the practice of DDR than the traditional one and offers a new perspective for practitioners and scholars to consider within Iraq s context In Iraq the standard DDR approach has largely failed to address the country s challenges related to civilian militias largely due to challenges with correctly sequencing the steps in the absence of a stable peace Fluid DDR addresses these concerns by providing the possibility of
