aspects of those topics in the light of the genre in which those topics are undertaken Accordingly different results are yielded from those analyses and this makes each type of analysis distinct from the other ones It is hoped that this work will be a useful source to all those whether theoretically practically or both interested in linguistics pragmatics of literature applied linguistics and literary stylistics

linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discoursal and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced **The Intertextual Dimension of Discourse**
