Ctrl+shift+enter Mike Girvin, 2013 **Mastering Excel Made Easy** TeachUcomp, Incorporated, 2007-05 Mastering Excel: Formula Tips and Tricks Mark Moore, 2013-10-24

Excel is all about formulas. Think through how to do a calculation, once, make sure it is correct, then copy it to other cells and use it as many times as you need to. In this lesson, we go through some of the most popular and few not so popular formulas; we review their syntax, how to use them, and we will also learn some other non-formula tricks that will make our Excel files do all the work for us. Some formulas we review are common, some not so common, but all of them are explained step by step with not technical jargon. Just plain English so everyone, even the math-averse, can easily grasp the concepts. There is also a follow-along workbook you can download so you can work through the formulas as you read the lesson. All images and exercises were created using Excel 2010 for Windows. Some exercises will appear different in prior versions. Some formulas are not available in Excel 2003.
