Against the Odds James Dyson, 1998 How an English inventor against all the odds took on all the multinationals and revolutionised housekeeping and became a millionaire at the same time

The Science of Serendipity Matt Kingdon, 2013-02-08 Innovation The word might make you think of Silicon Valley But innovation isn't the sole province of start-ups They didn't invent it and they're not always the ones from which we can best learn As Matt Kingdon argues in The Science of Serendipity it's corporate innovators battling within large established organisations who are the field's real heroes Tapping into 20 years of experience on the front lines of innovation bringing new products and services to market and helping organisations become more creative Kingdon dissects the ways in which corporations are continually reborn He looks at the anatomy of innovation asking How do time pressed executives go about taking risks How do they prepare to see and seize opportunity And how do you place humans with all of their fears and foibles at the heart of commercial success In a conversational jargon free style built on a practitioner's observations and anecdotes The Science of Serendipity traces the dilemmas that executives in a wide variety of firms face It details the steps taken to overcome the issues and get great ideas across the finish line If you're looking for a guide in your fight against the corporate machine this is the business book for you Matt Kingdon is the Co-founder Chairman and Chief Enthusiast of What If Innovation Partners For 20 years What If has partnered with the world's most successful forward looking companies businesses such as Barclays Four Seasons Google PepsiCo Pfizer and Virgin to galvanise innovation and deliver impact Its 250 inventors work across the Americas Europe and Asia

Fantastic Failures Luke Reynolds, 2018-09-11 Even the most well known people have struggled to succeed Find out what they learned and how they turned their failures into triumphs with this engaging and youthful guide on how to succeed long term There is a lot of pressure in today's society to succeed but failing is a part of learning how to be a successful person In his teaching career Luke Reynolds saw the stress and anxiety his students suffered over grades fitting in and getting things right the first time Fantastic Failures helps students learn that their mistakes and failures do not define their whole lives but help them grow into their potential Kids will love learning about some of the well known people who failed before succeeding and will come to understand that failure is a large component of success With stories from people like J K Rowling Albert Einstein Rosa Parks Sonia Sotomayor Vincent Van Gogh Julia Child Steven Spielberg and Betsy Johnson each profile proves that the greatest mistakes and flops can turn into something amazing Intermixed throughout the fun profiles Reynolds spotlights great inventors and scientists who discovered

and created some of the most important medicines devices and concepts of all time including lifesaving vaccines and medicines that were stumbled upon by mistake **Dwell** ,2003-10 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines *International Entrepreneurship in Small and Medium Size Enterprises* Hamid Etemad,2004-01-01 The drivers of globalization are removing the barriers that segregated the competitive space of the small and large firms in the past It is becoming increasingly difficult for independent small firms to thrive in their traditional markets unless they are globally competitive Managing an enterprise s commercial industrial and political relations well regardless of size and location is the essence of the entrepreneurial challenge in this competitive arena Small and medium size enterprises SMEs often face very different issues than large multinational enterprises do when confronting internationalization This volume provides an in depth discussion of these challenges The contributors to this volume explore the emerging patterns of SME growth and international expansion in response to the evolving competitive environment dynamics of competitive behavior entrepreneurial processes and formulation of strategy They examine the basis and requirements of growth and expansion from three perspectives the rapidly changing environment in which business is conducted entrepreneurial characteristics and the evolving strategic and competitive response to this changing business environment Business leaders scholars and students interested in international business and entrepreneurship will welcome this volume Computational Intelligence: A Compendium John Fulcher,2008-05-28 Computational Intelligence A Compendium presents a well structured overview about this rapidly growing field with contributions from leading experts in Computational Intelligence The main focus of the compendium is on applied methods tried and proven as being effective to realworld problems which is especially useful for practitioners researchers students and also newcomers to the field This state of handbook style book has contributions by leading experts *Tony Hunt's Structures Notebook* Tony Hunt,2007-08-22 The purpose of the Structures Notebook is to explain in the simplest possible terms about the structure of things and to demonstrate the fact that everything you see and touch live in and use living and man made has a structure which is acted upon by natural forces and reacts to these forces according to its form and material The Structures Notebook was originally written by Tony Hunt as a brief teaching aid for students at the Royal College of Art who had very little if any knowledge of physics or structural behaviour It has now been expanded and with this second edition updated into a more comprehensive book while retaining a simple visual and non mathematical approach to structures The book is divided into seven main sections in a logical sequence and is written in simple language Each section related to its text has a comprehensive set of hand drawn sketches which show as simply as possible what the text is about The book is almost totally non mathematical since the author believes very strongly that structural behaviour can be

understood best by diagrams and simple descriptions and that mathematics for the majority of people interested in design is a barrier The design of structures is a combination of art and science and to achieve the best solution concept should always come before calculation

Notes on Being a Man Scott Galloway, 2025-11-04 Bestselling author NYU professor and cohost of the Pivot podcast Scott Galloway offers a path forward for men and parents of boys Boys and men are in crisis Rarely has a cohort fallen further and faster than young men living in Western democracies Boys are less likely to graduate from high school or college than girls One in seven men reports having no friends and men account for three of every four deaths of despair in America Even worse the lack of attention to these problems has created a vacuum filled by voices espousing misogyny the demonization of others and a toxic vision of masculinity But this is not just a male issue Women and children can't flourish if men aren't doing well And as we know from spates of violence there is nothing more dangerous than a lonely broke young man Scott Galloway has been sounding the alarm on this issue for years In *Notes on Being a Man* Galloway explores what it means to be a man in modern America He promotes the importance of healthy masculinity and mental strength He shares his own story from boyhood to manhood exploring his parents difficult divorce his issues with anger and depression his attempts to earn money and his life raising two boys He shares the sometimes funny often painful lessons he learned along the way some of which include Get out of the house Action absorbs anxiety Take risks and be willing to feel like an imposter Don't let rejection stop you Be kind That's the secret to success in relationships Find what you're good at follow your talent Acknowledge your blessings and create opportunities for others Be of surplus value Being a good dad means being good to the mother of your children Life isn't about what happens to you it's about how you respond to it With unflinching honesty Scott Galloway maps out an enriching inspiring operator's manual for being a man today
