Intelligent Problem Solving. Methodologies and Approaches Rasiyah Logananthara, Günther Palm, Moonis Ali, 2003-07-31 The focus of the papers presented in these proceedings is on employing various methodologies and approaches for solving real life problems Although the mechanisms that the human brain employs to solve problems are not yet completely known we do have good insight into the functional processing performed by the human mind On the basis of the understanding of these natural processes scientists in the field of applied intelligence have developed multiple types of artificial processes and have employed them successfully in solving real life problems The types of approaches used to solve problems are dependant on both the nature of the problem and the expected outcome While knowledge based systems are useful for solving problems in well understood domains with relatively stable environments the approach may fail when the

domain knowledge is either not very well understood or changing rapidly The techniques of data discovery through data mining will help to alleviate some problems faced by knowledge based approaches to solving problems in such domains Research and development in the area of artificial intelligence are influenced by opportunity needs and the availability of resources The rapid advancement of Internet technology and the trend of increasing bandwidths provide an opportunity and a need for intelligent information processing thus creating an excellent opportunity for agent based computations and learning Over 40% of the papers appearing in the conference proceedings focus on the area of machine learning and intelligent agents clear evidence of growing interest in this area

Riccardi,Massimiliano Vasile,2017-09-12 This volume comprises a selection of works presented at the Numerical and
Evolutionary Optimization NEO 2016 workshop held in September 2016 in Tlalnepantla Mexico The development of powerful
search and optimization techniques is of great importance in today s world and requires researchers and practitioners to
tackle a growing number of challenging real world problems In particular there are two well established and widely known
fields that are commonly applied in this area i traditional numerical optimization techniques and ii comparatively recent bio
inspired heuristics Both paradigms have their unique strengths and weaknesses allowing them to solve some challenging
problems while still failing in others The goal of the NEO workshop series is to bring together experts from these and related
fields to discuss compare and merge their complementary perspectives in order to develop fast and reliable hybrid methods
that maximize the strengths and minimize the weaknesses of the underlying paradigms In doing so NEO promotes the
development of new techniques that are applicable to a broader class of problems Moreover NEO fosters the understanding
and adequate treatment of real world problems particularly in emerging fields that affect all of us such as healthcare smart
cities big data among many others The extended papers presented in the book contribute to achieving this goal

Infrastructure Design, Signalling and Security in Railway Xavier Perpinya,2012-04-04 Railway transportation has
become one of the main technological advances of our society Since the first railway used to carry coal from a mine in
Shropshire England 1600 a lot of efforts have been made to improve this transportation concept One of its milestones was
the invention and development of the steam locomotive but commercial rail travels became practical two hundred years later
From these first attempts railway infrastructures signalling and security have evolved and become more complex than those
performed in its earlier stages This book will provide readers a comprehensive technical guide covering these topics and
presenting a brief overview of selected railway systems in the world The objective of the book is to serve as a valuable
reference for students educators scientists faculty members researchers and engineers Advanced Network Technologies
