This reference work is organized in two parts. Part I consists of a series of short thematic essays discussing topics such as what primaries and caucuses are, what the difference between open and closed primaries is, varying methods used by the parties for delegate selection, and how campaign finance works in the primaries. Part II consists of a state-by-state description of recent primary caucus history and the methods currently used for delegate selection by Democrats and Republicans in each state.

The Long Red Thread Kyle Kondik, 2021-10-26 An incisive study that shows how Republicans transformed the US House of Representatives into a consistent GOP stronghold with or without a majority Long term Democratic dominance in the US House of Representatives gave way to a Republican electoral advantage and frequently held majority following the GOP takeover in 1994 Republicans haven't always held the majority in recent decades but nationalization partisan realignment and the gerrymandering of House seats have contributed to a political climate in which they've had an edge more often than not for nearly thirty years The Long Red Thread examines each House election cycle from 1964 to 2020 surveying academic and journalistic literature to identify key trends and takeaways from more than a half century of US House election results in order to predict what Americans can expect to see in the future

Out of the Running Shauna Shames, 2017-01-31 An inside look into why Millennials are rejecting careers in politics and what this means for the future of America's political system Millennials are often publically criticized for being apathetic about the American political process and their lack of interest in political careers But what do millennials themselves have to say about

the prospect of holding political office. Are they as uninterested in political issues and the future of the American political system as the media suggests? Out of the Running goes directly to the source and draws from extensive research including over 50 interviews with graduate students in elite institutions that have historically been a direct link for their graduates into state or federal elected office: Harvard Law School, Harvard's Kennedy School of Government, and Boston's Suffolk University Law School. Shauna Shames herself, a young graduate of Harvard University, suggests that millennials are not uninterested; rather, they don't believe that a career in politics is the best way to create change. Millennials view the system as corrupt or inefficient and are particularly skeptical about the fundraising-frenzied media attention and loss of privacy that have become staples of the American electoral process. They are clear about their desire to make a difference in the world but feel that the broken political system is not the best way to do so, a belief held particularly by millennial women and women of color. The implications of Shames' argument are crucial for the future of the American political system: how can a system adapt and grow if qualified intelligent leaders are not involved? An engaging and accessible resource for anyone who follows American politics, Out of the Running highlights the urgent need to fix the American political system as an absence of diverse millennial candidates leaves its future in a truly precarious position.

Waves of Discontent Jacob F. H. Smith, 2025-08-21 After a period of relative calm in congressional elections prior to 2006, America has experienced a series of highly competitive, volatile national elections. Since then, at least one of the US House, US Senate, and presidency has flipped party control, often with a large House or Senate seat swing, with the exception of the 2012 election. In *Waves of Discontent*, Jacob F. H. Smith argues that a pervasive feeling of displeasure in the American public has caused this increase in electoral volatility. Conducting statistical analyses of a wide array of surveys, Smith found that these feelings of displeasure translate to lower turnout among voters from the president's party and a higher percentage of independents voting for the other party. Subsequently, he conducted a content analysis of New York Times articles to look at the connection between unrest in American society and seat swings in congressional elections, even before the existence of polling. Examining the consequences of volatility in congressional elections reveals that political amateurs are more likely to win in wave years than in normal years. Based on this data, Smith presents a new theory about the policy process: the policy doom loop, in which frustration among voters at both the inability of Congress to pass policy and anger at policies that actually do pass results in even more churn in congressional elections. *Waves of Discontent* offers some suggestions to promote constructive policymaking efforts in Washington to reduce frustration in the electorate.

Departures on the House Scott Crass, 2020-01-09 The word change stormed onto the political lexicon in 1992 when Democratic Presidential nominee Bill Clinton aimed to deny George H. W. Bush a second term. Often overlooked, however, is that change also caused a ruckus in Congress. Redistricting, a check-overdraft scandal that consumed the chamber, and overall frustration with the system produced a wild and woolly year that sent 110 House members into retirement or defeat. *Departures On The House* portrays
