Mastering the Travel Intermediaries Ben Vinod, 2024-06-25 This book chronicles the role of travel intermediaries global distribution systems GDS travel management companies TMC and online travel agencies OTA in the distribution of travel products The book covers the historical development of these intermediaries and explores their current state and future prospects Almost six decades after the introduction of computerized reservations systems and four decades after the introduction of Global Distribution Systems that allowed travel agents to make automated airline bookings the distribution of air products is amid a major transition A fundamental change is pricing power which shifts from the GDSs to the airlines for the indirect channel These changes are driven by advancements in technology market economics and airline cost controls leading to the emergence of new revenue models that will permanently alter the landscape of air distribution As a result travel intermediaries are experiencing the effects of these turbulent times and must adopt innovative approaches and initiatives to adapt and transform their business models rather than maintaining the status quo In addition to the ongoing transformation over the next decade the advancements in emerging technologies like blockchain and decentralized digital identity will further revolutionize the distribution landscape across all sectors of the travel industry

Skyteam Leon E. Jens Christensen,2009-08-30 The experience economy is a fourth economic field different from commodities goods and services Experiences are an economic value added to a product or identical with the product When you buy an experience you pay to spend time enjoying a series of memorable events that a company stages to engage the customer in a personal way The experience dimension has moved into a predominant place since the 1990s fueled by an expanding global and digital economy In developed countries people get richer and more individualized and having met all basic materiel needs they focus increasingly on personal development and self realization Demand for experience based products increases such as tourism and sports as well as film music and other contents of media and interactive technologies Furthermore the demand for experience values is extended to include any product and dimension of modern societies such as the design of houses furniture clothes cars computers etc This is not a completely new story Commercial entertainment and design has been around for a century or so And in addition universal values of love sex belief family and the meaning of life have always been vital to human beings What is new is the fact that capitalism is invading more and more fields of experiences connected with emotions and the extension of life proportions In all developed countries and increasingly on a global scale a series of expanding industries have emerged to supply the market with experience oriented goods In this book the business development of markets and industries is covered from tourism to media and entertainment and from design to sex including leading companies and trends in all industries involved Transforming Airlines Nawal K. Taneja,2020-03-19 This book

provides a flight plan for riding the impending connectivity transformation curve. It takes the perspective of actionability highlighting initiatives that executives in airlines and related businesses can use from the insights of multi industry executives. The emphasis is on execution not on the concepts themselves. There is a cluster of at least four distinct megatrends that may converge to form disruptive conditions: 1. elevated expectations of existing and new customer segmentations: those who expect available and accessible air mass transportation systems and those who expect connected services and seamless travel on different modes of transportation; 2. new emerging technology incorporated in the air and ground vehicles that will create new opportunities for existing and new service providers to offer new value propositions; 3. platforms developed around the ecosystem of customers; and 4. the impact on travel that the fast changing demographic and economic characteristics of two major countries, India and China. These megatrends could lead existing or new businesses to create value propositions specifically dedicated to the new segments once each reaches a critical mass. Drawing on the author's own experience in the airline industry and related businesses, this book discusses the how relating to reimagining the business, re-entrepreneurship, the organization innovating through partnerships, reengaging with customers and employees and rebranding the business in response to these trends. This book is recommended reading for all senior level practitioners of airlines and related businesses worldwide.

Power in Numbers Philippe Douste-Blazy, 2010-10. The story of UNITAID begins with two world leaders but quickly becomes a lesson in popular philanthropy involving millions of people each making a small contribution to a program aimed at treating and ultimately eliminating the threat of HIV/AIDS, tuberculosis and malaria in the developing world. In partnership with the Clinton HIV/AIDS Initiative, CHAI, UNICEF and other organizations, UNITAID has pioneered techniques for raising massive amounts of money from a wide pool of donors. UNITAID's newest program collecting small contributions via a check box on the world's biggest travel websites launches in the United States in January 2010. It is a fascinating model for philanthropy proving that you can scale up both the fundraising and the ambition of lifesaving treatment programs. Moreover, UNITAID has proved able to continue its work uninterrupted by the financial turmoil that has blighted other private and government aid programs. It provides a model for challenging times. Launched as a crucial component of UNITAID's Massive Good, substantial national publicity and promotion campaign. Power in Numbers is an inspiring case study for anyone interested in social justice, public health, philanthropy or fundraising.
