Agenda 2063 The Africa We Want United Nations:

The Emergent African Union Law Olufemi Amao, Michèle Olivier, Konstantinos D. Magliveras, 2021-10-07 This book is a groundbreaking study of the emergence of a unique African Union legal system with contributions from a diverse collection of scholars and practitioners It highlights how law stands at the heart of the successful regional integration effort in Africa and explores among other issues the extent to which African Union law is having an impact on domestic laws This trend has been particularly noticeable in the area of human rights the rule of law democratic principles and aspects of constitutional law Furthermore the book examines how the African Union is engendering new norms from its legal order such as the non indifference norm the norm on unconstitutional change of government free trade free movement of people economic regulation and democratic constitutionalism The book also analyses how the African Union legal order has led to the emergence of a continental level judicial system The quasi judicial system put in place under the African Charter on Human and Peoples Rights and administered by the African Commission on Human and Peoples Rights is now complemented by the African Court on Human and Peoples Rights This book contends that the continental level judicial system is playing a crucial role in the moulding of emergent norms

The African Union Tony Karbo, Tim Murithi, 2017-11-23 The African Union has been a major factor in establishing peace security and development in Africa Today however the intranational body is struggling in the midst of a perceived dissipating appetite for supporting continental institutions Previously seen as the panacea to Africa's continuing problems with violence and corruption in society under the slogan African Solutions to African Problems the African Union this book argues seems to have run its course Recognizing that the measured successes in political emancipation which have been recorded across the African continent do not seem to have translated into economic and social gains for its 1.2 billion citizens the AU adopted a new development framework dubbed Agenda 2063 The framework calls on African leaders to rediscover the Pan African spirit and to create the Africa Africans want In practice this means a new focus and engagement with the African Diaspora tapping into their strong track record in economic development As this book shows however there remain deep differences over the meaning timing and sequencing of pan African integration Indeed different member states have different understandings of the role of the African Union itself This essential handbook from one of the leading research institutions on the continent seeks to uncover what some of those understandings are and why the unification project has remained so elusive

The Charter of the United Nations, 2024-07-04 Since the third edition of this commentary on the Charter of the United Nations was published in 2012 the text of the Charter has not changed but the world has Central pillars of the international order enshrined in the UN Charter are facing serious challenges notably the prohibition of the use of force Human rights too have come under increasing pressure now also from contemporary information technology Global warming poses fundamental challenges for the world community as a whole in its effort to stabilize global ecosystems Fully updated the commentary takes up these and other

developments It features new chapters on Climate Change and the Human Rights Council The commentary remains the authoritative article by article account of the legislative history interpretation and practical application of each and every Charter provision Written by a team of distinguished scholars and practitioners this book combines academic research with the insights of practice It is an indispensable tool of reference for all those interested in the United Nations and its legal significance for the world community The Commentary will be crucial in combining solid legal foundations with new directions for the development of international law and the United Nations in the twenty first century **The Palgrave**

Handbook of Religion, Peacebuilding, and Development in Africa Susan M. Kilonzo,Ezra Chitando,Joram

Tarusarira,2023-10-17 This Handbook explores the ways in which religion among the African people has been applied in situations of conflict and violence to contribute to sustainable peace and development It analyzes how peacebuilding inspired and enabled by religion serves as the foundation for sustainable development in Africa while also acknowledging that religion can also be a tool of destruction and can be used to fuel violence and underdevelopment Contributors to this volume offer theoretical discussions from existing literature as well as experiences of practitioners to deepen the readers understanding on the role of religion and religious institutions in peacebuilding and development in Africa The Handbook provides reflections on possible future developments as well thereby aligning with the goals of SDG 16 African Values and

Development Ezra Chitando,Eunice Kamaara,2025-01-31 This book considers the importance of African values not only in catalysing development but in sustaining it Arguing for an urgent need for rapprochement between African politicians and intellectuals the book discusses how African values and identities can contribute to the successful realization of initiatives such as the African Union s Agenda 2063 and the United Nation s Sustainable Development Goals SDGs Over the course of the book the authors consider key themes such as identity indigenous and modern worldviews personhood individual and communal perspectives peace and conflict and well being The book explores the role of religion and moral values as well as African worldviews such as Ubuntu Overall the book demonstrates that African values will be central to galvanising Africa s post colonial transformation This book will be an important read for policymakers and for researchers working on African development politics sociology religion and philosophy Space Fostering African Societies Annette Froehlich,2022-01-01

This peer reviewed book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union s Agenda 2063 Following on from Part 1 and 2 which were highly acclaimed by the space community it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa but covers an even more extensive array of relevant and timely topics addressing all facets of African development It demonstrates that while there have been significant achievements in recent years in terms of economic and social development which have lifted many of Africa s people out of poverty there is still a great deal that needs to be done to fulfill the basic needs of Africa s citizens and afford them the dignity they deserve

To this end space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations the book will appeal to both students and professionals in fields such as space studies international relations governance and social and rural development.

Post-Independence Development in Africa David Mhlanga, Emmanuel Ndhlovu, 2023-07-11 The book *Post-Independence Development in Africa: Decolonisation and Transformation Prospects* revisits the development debates and development realities in Africa. This is achieved by offering theoretical comments about post-independence development in Africa and by providing historical details pertaining to the development approaches adopted in Africa immediately after independence in the 1960s and mid 70s. Sitting at the intersection of two sets of scholarly literature namely literature on development and literature on development discourses and practices in Africa the book comprises a mixture of detailed sector specific accounts of the status of development on the continent. The chapters in the book also contribute to clarifying how the two strands of literature intersect using several case studies across Africa. [Agricultural, Biosystems, and Biological Engineering Education](#) Umezuruike Linus Opara, 2024-09-30 Agricultural engineering developed as an engineering discipline underpinned by physics applies scientific principles knowledge and technological innovations in the agricultural and food industries. During the last century there was exponential growth in engineering developments which has improved human wellbeing and radically changed how humans interact with each other and our planet. Among these Agricultural Mechanization is ranked among the top 10 in a list of 20 Top Engineering Achievements of the last century that have had the greatest impact on the quality of life. While many success stories abound the problems of low appeal among students identity crises and limited job opportunities in many climes continue to trouble the discipline's future in many parts of the world. Yet agriculture and agricultural engineering remain fundamental to assuring food and nutrition security for a growing global population. *Agricultural Biosystems and Biological Engineering Education* provides the first comprehensive global review and synthesis of different agricultural biosystems and biological engineering education approaches including a detailed exposition of current practices from different regions. **Key Features** Describes novel approaches to curriculum design and reform. Outlines current and emerging epistemology and pedagogies in ABBE education. Provides a framework to grow agricultural engineering in Africa and other developing regions. Highlights the role of ABBE education in the context of the SDGs. Presented in 3 parts and containing 42 chapters this book covers the historical evolution of agricultural engineering education and discusses the emergence of biological and biosystems engineering education. It will appeal to engineers and other professionals education planners and administrators and policy makers in agriculture and other biological industries.
