

Principles of Agroecosystem Analysis (Conway, 1986)

- It isn't necessary to know everything about an agroecosystem in order to produce a realistic and useful analysis ('optimal ignorance').
- Understanding the behavior and important properties of an agroecosystem requires knowledge of only a few key functional relationships.
- Producing significant improvements in the performance of an agroecosystem requires changes in only a few key management decisions.
- Identification and understanding of these key relationships and decisions requires a limited number of key questions are defined and answered.

Training Notes for Agroecosystem Analysis and Rapid Rural Appraisal Gordon R. Conway, Jennifer A. McCracken, Jules N. Pretty, International Institute for Environment and Development. Sustainable Agriculture Programme, 1987

After the Green Revolution Gordon R. Conway, Edward B. Barbier, 2013-11-05 The Green Revolution of the 60 s and 70 s produced immense gains in food cereal production in the Third World But there are huge problems in the post revolutionary era farmers with small or marginal holdings have benefited less than wealthier farmers intensive mono cropping has made production more susceptible to environmental stresses and shocks Now there is evidence of diminishing returns from intensive and intensively chemical agricultural production What is needed is a new approach equally revolutionary but different in its ideas and style The authors set out what they mean by sustainable agriculture in the new era and look at the effects of international economic restraints and of national policies on the kind of development they see as necessary They chart a path for sustainable livelihoods for Third World farmers enmeshed by forces outside their control They describe methods of evaluating and resolving the tough trade offs all levels of intervention from international trade down to the individual farm This book cannot provide all the answers but it does indicate what international conditions we need to be aware of what national policies we need to advocate and what approaches at the local level we need to adopt to ensure the goal of agricultural sustainability Originally published in 1990

Economics, Natural-Resource Scarcity and Development (Routledge Revivals) Edward B Barbier, 2013-06-26

Global warming is an increasing problem tropical forests are being wiped out and major upper watersheds are being degraded Using insights provided by environmentalism ecology and thermo dynamics this book first published in 1989 outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced With examples drawn from Latin America and Indonesia he not only develops a major theoretical advance but shows how it can be applied Barbier s work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability

Environments and Livelihoods Koos Neefjes, 2000 This book is intended to be used to support the campaigning and lobbying work of local and international development organizations to improve the formulation and implementation of development strategies and to strengthen participatory project planning monitoring and impact assessment in poverty and environmental change *RRA Notes Number 1* , Publications of the International Agricultural Research and Development Centers , 1989 **The Economics of Sustainability** John C.V. Pezzey, Michael A. Toman, 2017-09-08 Before the late 1980s when the ideas of sustainability and sustainable development to the forefront of public debate conventional neo classical economic thinking about development and growth had rarely given any consideration to the needs of future generations or the sustainability of natural resource use Defining sustainability broadly as intergenerational fairness in the long term decision making of a whole society and using established economic concepts this selection of refereed journal articles brings a famously ill defined concept into sharp focus providing academics at all levels with a formidable research tool Spanning thirty years of the most important philosophical theoretical and empirical contributions from both critics and defenders of neo classical assumptions and methods of economic analysis this focused collection of papers constitutes a unique balanced resource on the full range of intellectual debates surrounding the economics of sustainability 21st Century Homestead: Agroecology Rob Koogler, 2015-02-21 21st Century Homestead Agroecology contains everything you need to stay up to date on organic agroecology **Sustainable Development Social Organization, Institutional Arrangements and Rural Development** Sergio Sepúlveda, 1997 *Training Resource Book for Agro-ecosystem Mapping* Clive Lightfoot, 1989 *21st Century Homestead: Organic Farming* Lamont Fedigan, 2015-02-21 21st Century Homestead Organic Farming contains everything you need to stay up to date on organic farming **Smallholders, Householders** Robert McC. Netting, 1993 Contrasting the prevailing theories of the evolution of agriculture the author argues that the practice of smallholding is more efficient and less environmentally degrading than that of industrial agriculture which depends heavily on fossil fuel chemical fertilizers pesticides and herbicides He presents a convincing case for his argument with examples taken from Africa Asia Europe and the Americas and demonstrates that there are fundamental commonalities among smallholder cultures *Smallholders Householders* is a detailed and innovative analysis of the agricultural efficiency and conservation of resources practiced around the world by smallholders *Proceedings of the 1985 International Conference on Rapid Rural Appraisal, Khon Kaen University Mahāwitthayālai Khōn Kāen*, 1987 Agricultural Research Alternatives William Lockeretz, Molly DelCarmen Anderson, 1993-01-01 Clearly the debate is no longer over agricultural sustainability as a legitimate goal but about how to fulfill that goal Research is a vital factor contributing to the creation of a sustainable agriculture Entrenched ideas about the way agricultural research is conducted have been challenged by farmers environmentalists food safety advocates rural activists and others William Lockeretz and Molly D Anderson meet these challenges and chart a reasoned course through the fray They analyze the potential and the limits of various research

approaches associated with alternative agriculture multidisciplinary research application of ecological principles in understanding agricultural systems emphasis on the use of agricultural information use of working farms as research sites and the involvement of farmers in agricultural research They also propose reforms in institutional aspects of agricultural research the organization of academic departments evaluation of professional achievement functioning of grant programs and the education of agricultural researchers An Evaluation of Community-based Integrated Farming Systems Creating Conditions for Sustainability Tracy Veronica Dunbar,1997 **Discussion Paper** ,1995 **Peak Soil** Dr. Sahadeva Das,2018-01-01 Peak Soil The foundation of any civilization is adequate availability of food and water So anyone with common sense would think the top priority of nations throughout history would be taking good care of the land
