Theorising Literary Islands Ian Kinane, 2016-11-16

Theorising Literary Islands is a literary and cultural study of both how and why the trope of the island functions within contemporary popular Robinsonade narratives. It traces the development of Western isomania or our obsession with islands from its origins in Daniel Defoe's Robinson Crusoe right up to contemporary Robinsonade texts focusing predominantly on American and European representations of fictionalized Pacific Island topographies in contemporary literature, film, television and other media. Theorising Literary Islands argues that the ubiquity of island landscapes within the popular imagination belies certain ideological and cultural anxieties and posits that the emergence of a Western popular culture tradition can largely be traced through the development of the Robinsonade genre and through early European and American fascination with the Pacific region.

Literature and International Relations Paul Sheeran, 2016-05-23. Making a strong case for the relevance of literary production to understanding international relations, this persuasive volume highlights the potential rewards of developing a methodology to bring literature to bear on a discipline which has tended to neglect fictional sources. Paul Sheeran considers the deep insight that can be gained from the study of key works in fiction and literature to enhance knowledge of the social forces shaping world affairs. While there are numerous relevant works, the author has carefully selected multi-faceted and

colourful sources of material to explore developments in contemporary global issues such as the demise of the Soviet Union the attack on the World Trade Centre infectious diseases and human conflict This exciting book enthusiastically breaks new ground and is highly suitable for courses on international relations cultural studies and literature

Free Trade in the Bermuda Triangle-- and Other Tales of Counterglobalization Brett Neilson, 2004 An alternative approach to mapping the world offers a new way to contest capitalism and globalization Shangri La the Bermuda Triangle Transylvania the Golden Triangle far flung in popular conception these anomalous places nonetheless occupy the same mysterious zone a mythography of unruly cartographic practices And because this mythography becomes associated with a particular area of the earth's surface it may well suggest an alternative means of mapping the world dissociated from the dominant geographical paradigms of nation state economic region and the global local marketing nexus Large scale nonnational geographical spaces that find their genesis in popular feeling mystery and belief these four sites provide Brett Neilson with the basis not only for rethinking the current global reorganization of space and time but also for questioning the dominant narrative by which globalization marks the victory of capitalism Free Trade in the Bermuda Triangle moves between analysis of popular fantasies and engagement with on the ground realities weaving together topics as diverse as airplane disasters off the U S Atlantic coast the global drug trade vampire culture in postsocialist Europe and the search for utopia in Chinese occupied Tibet The study of globalization is largely a solemn affair occupied with increasing economic polarities environmental degradation and global insecurity Free Trade in the Bermuda Triangle maintains a critical focus on these sobering issues but at the same time asks how popular pleasure and enjoyment can create viable alternatives to the current global order Neilson takes seriously the proposition that capitalism must be contested at its own level of generality finding provisional grounds for resistance in nonlocal transnational spaces that embody quotidian hopes desires and anxieties By studying the real and imagined dimensions of these popular geographies his book seeks resources for social betterment in the fallen mythologies of the contemporary postutopian world
