A Minimalist Approach to Scrambling Simin Karimi, 2008-08-22 This study addresses the problems scrambling languages provide for the existing syntactic theories by analyzing the interaction of semantic and discourse functional factors with syntactic properties of word order in this type of languages and by discussing the implications of this interaction for Universal Grammar Three interrelated goals are carefully followed in this work The first is to analyze the syntactic structure of Persian a language which exhibits free word order With this analysis the author has accounted for the relative order of categorized expressions the motivation for their possible rearrangements and the grammatical results of those reorderings In this respect a broad range of major syntactic phenomena including object shift Case Extended Projection Principle EPP binding and scope interpretation of quantifiers interrogative phrases adverbial phrases and negative elements are examined This monograph is the first major theoretical

work ever published on Persian and therefore fills the existing gap by providing insight into the syntactic structure of this language The second goal is to connect these insights to similar linguistic properties in languages in which scrambling occurs e g German Dutch Hindi Russian Japanese and Korean and to provide a deeper understanding of this group of genetically diverse but typologically related languages The final and principal goal is to situate the results of this work within the framework of the Minimalist Program MP The investigations in this study indicate that scrambling is not an optional rule and that certain principles of MP such as the Minimal Link Condition are only seemingly violated in these languages Furthermore it is shown that careful analysis of scrambling with respect to binding and scope relations and a reanalysis of the properties of A and A movements cast some doubts on the relevance of a typology of movement in natural language A *Grammar of the Persian Language - Scholar's Choice Edition* Duncan Forbes,2015-02-19 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant A *Grammar of the Persian Language* ,1828
