The Invention of Martial Arts Paul Bowman, 2020-12-31 Through popular movies starring Bruce Lee and songs like the disco hit Kung Fu Fighting martial arts have found a central place in the Western cultural imagination But what would

martial arts be without the explosion of media texts and images that brought it to a wide audience in the late 1960s and early 1970s In this examination of the media history of what we now call martial arts author Paul Bowman makes the bold case that the phenomenon of martial arts is chiefly an invention of media representations Rather than passively taking up a preexisting history of martial arts practices some of which of course predated the martial arts boom in popular culture media images and narratives actively constructed martial arts Grounded in a historical survey of the British media history of martial arts such as Bartitsu jujutsu judo karate tai chi and MMA across a range of media this book thoroughly recasts our understanding of the history of martial arts By interweaving theories of key thinkers on historiography such as Foucault and Hobsbawm and Said s ideas on Orientalism with analyses of both mainstream and marginal media texts Bowman arrives at the surprising insight that media representations created martial arts rather than the other way around In this way he not only deepens our understanding of martial arts but also demonstrates the productive power of media discourses

discussed in this anthology experienced lives submerged in foreign cultures lives compounded by the difficulties of communicating in foreign languages changing diets and often being in hostile living conditions Their lives are far from the associations we usually associate with martial arts now steeped in pure exercise for health or tournament competitions Becoming familiar with some of the Western pioneers of Asian martial arts bring us back to understand many of the original reasons for learning these combatives Their lives and experience show us how and why the more serious side of Asian fighting arts remain illusive for most who in practice need not confront the lethal aspects of these traditions **W.E.**

Martial Musings: A Portrayal of Martial Arts in the 20th Century Robert W. Smith, 1999 In every century there are unique individuals whose fate makes them standing symbols of unique merit and accomplishment Robert W. Smith's *Martial Musings* stands out as the sole literary work which offers readers a special perspective of martial arts as they evolved during the 20th century Smith personally escorts the reader on a martial arts tour He starts with his own initial involvement in the arts then launches outward across the nation over to Asia and eventually home again Some of the topics covered in the book include martial arts theory and practice portrayals of leading Asian instructors profiles of Westerners who studied the arts and brought them back to their respective countries and an historical record of the evolution of fighting arts in the West *Martial Musings* represents the fourteenth book Smith has written on the subject and is a broader somewhat historical semi autobiographical commentary on martial arts in the 20th century But what makes this book such a joy to devour is the literary relish Smith stirs in with the book's basic ingredients He astutely couples combatives with literary panache and a ready wit In short *Martial Musings* introduces the reader to the individuals who shaped martial arts in the 20th century The
