Lembo,Gastón Astesiano,Rosane Lohbauer,Rodrigo Barata,Natasha Rosset,2019-05-07 Investment in infrastructure is admittedly one of the main forms of economic development Traditionally the Public Administration implements infrastructure projects committing taxpayers money to finance them For the past decades demand for infrastructure has been growing steadily but public funds for current and future needs are limited and the public finances of many governments have increasingly reached a point where long term borrowing is not a ready option In a recent study GI Hub estimated the cumulative global infrastructure need from 2015 to 2040 and the investment gap for the period US 94 trillion would be needed in investment and the gap is US 15 trillion This has led the government to accept the growing importance of the private sector participation in the financing and management of infrastructure projects so it began seeking alternative

methods of procurement One method whose applicability is increasing is the use of public private partnerships PPPs to finance and or manage infrastructure projects In this regard well prepared infrastructure projects can generate high social rate of returns and improves well being whereas inadequate infrastructure represents a barrier to growth and improved quality of life and can lead to unsustainable financial burdens for the government especially in developing countries Although not all infrastructure is suitable to follow the PPP route those policy makers that choose to shift from public infrastructure financing to private partner have to consider the nature and motivations of long term investors and the generation of value for money as well that is to align the interests of both the public and private sectors With the participation of a private partner in well prepared investment projects there may be larger investments and the population s life quality improvement Also PPPs are a way to introduce private sector technology and innovation into providing better public services through innovative planning and design and efficient project management Building and maintaining infrastructure are essential for economic expansion and social development if delivered efficiently and effectively it can translate into economic growth However the world is not spending enough on infrastructure to catch up with technological changes urbanization and shifting demographics The Inter American Bank IDB and the Global Infrastructure Hub GIH decided to analyze and carry out a research on the legal framework for PPPs in Latin America and the Caribbean Region to establish guidelines on PPP law leading practices

Conflict Resolution Beyond the Realist Paradigm Philip Gamaghelyan,2017-09-26 Conflict Resolution holds the promise of freeing approaches and policies with regard to politics of identity from the fatalistic grip of realism While the conceptual literature on identity and conflicts has moved in this alternative direction conflict resolution practice continues to rely on realist frames and acts as an unwanted auxiliary to traditional international relations Perpetuation of conflict discourses marginalization and exclusion of affected populations are widespread They are caused by the overreliance of conflict resolution practice on the binary frames of classic IR paradigms and also by the competitive and hierarchical relationships within the field Philip Gamaghelyan relies on participatory action research and collective autoethnography to expose patterns of exclusion and marginalization as well as the paradoxical reproduction of conflict promoting frames in current conflict resolution practice applied to the Nagorno Karabakh and Syrian crises He builds on the work of postmodernist scholars on reflective practice and on discourse analysis to explore alternative and inclusive strategies with a transformative potential The IR discipline that has dominated policymaking is only one possible lens and often a deficient one for defining preventing or resolving contemporary conflicts wrapped in identity politics Other conceptual frameworks can help to rethink our understanding of identity and conflicts and reconstruct them as performative and not static phenomena These transformative frameworks are increasingly influential in the conflict resolution field and can be applied to policymaking
