The Rise of the Graphic Novel Alexander Dunst, 2023-07-20 Bringing digital humanities methods to the study of comics this monograph traces the emergence of the graphic novel at the intersection of popular and literary culture Based on a representative corpus of over 250 graphic novels from the United States Canada and Great Britain it shows how the genre has built on the visual style of comics while adopting selected features of the contemporary novel This argument positions the graphic novel as a crucial case study for our understanding of twenty first century culture More than simply a niche format graphic novels demonstrate how contemporary literature reworks elements of genre narrative reconfiguring rather than abolishing distinctions between high and low The book also puts forward a new historical periodization for the graphic novel

Theorizing Art Cinemas David Andrews, 2013-11-15 The term art cinema has been applied to many cinematic projects including the film d art movement the postwar avant gardes various Asian new waves the New Hollywood and American indie films but until now no one has actually defined what art cinema is Turning the traditional highbrow notion of art cinema on its head *Theorizing Art Cinemas* takes a flexible inclusive approach that views art cinema as a predictable way of valuing movies as art movies an activity that has occurred across film history and across film subcultures rather than as a traditional genre in the sense of a distinct set of forms or a closed historical period or movement David Andrews opens with a history of the art cinema super genre from the early days of silent movies to the postwar European invasion that brought Italian Neorealism the French New Wave and the New German Cinema to the forefront and led to the development of auteur theory He then discusses the mechanics of art cinema from art houses film festivals and the academic discipline of film studies to the audiences and distribution systems for art cinema as a whole This wide ranging approach allows Andrews to develop a theory that encompasses both the high and low ends of art cinema in all of its different aspects including world cinema avant garde films experimental films and cult cinema All of these art cinemas according to Andrews share an emphasis on quality authorship and anticommercialism whether the film in question is film festival favorite or a midnight movie

Cinematic Appeals Ariel Rogers, 2013-10-22 Cinematic Appeals follows the effect of technological innovation on the cinema experience specifically the introduction of widescreen and stereoscopic 3D systems in the 1950s the rise of digital cinema in the 1990s and the transition to digital 3D since 2005 Widescreen films drew the spectator into the world of the screen enabling larger than life close ups of already larger than life actors The technology fostered the illusion of physically entering a film enhancing the semblance of realism Alternatively the digital era was less concerned with manipulating the viewer s physical response and more with generating information flow awe disorientation and the disintegration of spatial boundaries This study ultimately shows how cinematic technology and the human experience shape and respond to each other over time Films discussed include Elia Kazan s East of Eden 1955 Star Wars The Phantom Menace 1999 The Matrix 1999 and Thomas Vinterberg s
