the Laboratory Rat in Toxicology and Biomedical Research Robert L. Maynard,Noel Downes,2019-02-08 Anatomy and Histology of the Laboratory Rat in Toxicology and Biomedical Research presents the detailed systematic anatomy of the rat with a focus on toxicological needs Most large works dealing with the laboratory rat provide a chapter on anatomy but fall far short of the detailed account in this book which also focuses on the needs of toxicologists and others who use the rat as a laboratory animal The book includes detailed guides on dissection methods and the location of specific tissues in specific organ systems Crucially the book includes classic illustrations from Miss H G Q Rowett along with new color photo micrographs Written by two of the top authors in their fields this book can be used as a reference guide and teaching aid for students and researchers in toxicology In addition veterinary medical students researchers who utilize animals in biomedical research and researchers in zoology comparative anatomy physiology and pharmacology will find this book to be a great resource Illustrated with over a hundred black and white and color images to assist understanding Contains detailed descriptions and explanations to accompany all images helping with self study Designed for toxicologic research for people from diverse backgrounds including biochemistry pharmacology physiology immunology and general biomedical sciences

The Primate Nervous System, Part III Floyd E. Bloom,A. Bjorklund,T. Hokfelt,1999-10-26 This volume is the third and final part of the planned coverage of the neurochemical circuitry of the primate central nervous system The five chapters included in this volume complement and integrate magnificently with the two prior volumes Included in the volume are the following a two fold exposition on the human forebrain comprised of a comprehensive overview of the entire human forebrain and a specific focus on the basal forebrain a region critical for a wide range of human problems ranging from substance abuse to Alzheimer s disease a critical synthesis of the primate basal ganglia a region under intense scrutiny for the organization of motor programs and for their dysfunctions in Parkinson s disease Huntington s disease and other

malfunctions the chemical and anatomic details of the primate hippocampal formation in extenso and lastly a review of the rapidly growing literature on the mesocortical projection of dopaminergic circuits onto the primate frontal cortex a system highly linked to higher order mental abstractions as well as the dysfunctions of schizophrenia Scholars will recognize that the laying out of these status reports on our still vastly incomplete examination of the primate brains is an opportunity for progress

The Central Nervous System Per Brodal,2010-03-29 A textbook of neuroscience for undergraduate medical students providing a concise yet critical treatment of structure function relationships as a basis for clinical thinking It aims at conveying an understanding of how the nervous system performs its tasks by using data from molecular biology to clinical neurology

Sleep and Dreaming Edward F. Pace-Schott,2003-02-27 How and why does the sleeping brain generate dreams Though the question is old a paradigm shift is now occurring in the science of sleep and dreaming that is making room for new answers From brainstem based models of sleep cycle control research is moving toward combined brainstem forebrain models of sleep cognition itself The book presents five papers by leading scientists at the center of the current firmament and more than seventy five commentaries on those papers by nearly all of the other leading authorities in the field Topics include mechanisms of dreaming and REM sleep memory consolidation in REM sleep and an evolutionary hypothesis of the function of dreaming The papers and commentaries together with the authors rejoinders represent a huge leap forward in our understanding of the sleeping and dreaming brain The book's multidisciplinary perspective will appeal to students and researchers in neuroscience cognitive science and psychology
