Nature of Inner Aspect Jonathan E. MacDonald, 2008 This book explores the syntactic nature of inner aspect from a minimalist perspective It begins with the new observation that there are two independent properties at play in English inner aspect the object to event mapping and event structure From a discussion of English statives and Russian it is concluded that the former property is variant and the latter universal a minimalist conception of language variation arises naturally in this context Additionally an exploration of a lexical derivational approach to achievements leads to the expectation that there are no accomplishments in the lexicon A detailed look at idioms suggests that this expectation is met These results support the division of labor between an operative lexicon and narrow syntax in aspectual composition this naturally poses a problem for neo constructional approaches to inner aspect Finally one conclusion reached about the syntactic nature of inner aspect regards the object to event mapping it is a purely syntactic phenomenon *A Bit of This and a Bit of That* Michael R.

Whitcomb, 2017-10-26 *A Bit Of This And A Bit Of That* is the second story told using no word longer than four letters Like the first it was spawned from a classroom exercise in Australia where the author taught for almost 30 years From the first book *This Is As Big As It Gets* Jake returns to his friends Paul and Jane who are now married and have a son Andy Between them they help Jake to adjust to the loss of well read the book and find out Their journey not only takes them widdershins a colourful word for counter clockwise around England but also into a world of birds and a world beyond this one *Linguistic perspectives from the classroom*, 2004 **Researching and Applying Metaphor in the Real World** Graham Low, Alice

Deignan, Lynne Cameron, Zazie Todd, 2010 It has become increasingly clear that metaphor needs to be explored in terms of

the social and discourse context in which it is used especially where the aim is to address real world problems The notion of real world metaphor research has been developed to describe this important area of investigation This book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed Research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description Methods include corpus analysis experimentation discourse analysis cross cultural analysis and genre analysis In each case the empirical studies refer back to Gibbs s opening overview of real world research The result is an invaluable and cross referenced collection of papers addressing real world problems **Primary English**

classroom experiments Additions to the currently available armoury of teaching methods are proposed The kinds of target language items under examination in the book range from single words over multiword units to grammar patterns Throughout the volume illustrates how much pedagogy oriented Cognitive Linguistics has matured in recent years
